1 Anti-Slip Tapes

Offer added protection from Slip, Trip and Fall incidents. A wide variety of grades and materials exist to perfectly suit your application needs.

Product applications:

- Stair treads, steps and platforms
- Wet or oily areas
- Transition areas from one floor surface to another
- Floor markings to denote hazards
- Indoor or outdoor slip hazards
- Tow motors, cherry pickers, construction or other equipment
- Loading docks
- Shower areas
- Catwalks
- Ladders
- Scaffolds

2 Floor Marking Tapes

Are an effective and easy solution for workflow and organization in your Facility.

Product applications:

- Forklift traffic marking
- Fire Aisle marking
- Storage area marking
- Fire equipment area marking
- Machine boundaries
- Hazard areas
- Marking locations of first aid and safety equipment
- General workflow

3 Reflective Tapes

Offer increased visibility in daytime and nighttime applications. Available in a variety of grades to suit any application.

Product applications:

- Property and gate markers
- Equipment
- Tow motors and forklifts
- Bollard and railing markings
- Trailers
- Beams and posts
- Fleet vehicle markings
- Entrances and exits
- Loading docks
- Low hanging hazards

4 Glow-in-the-dark Tapes

Are an essential part of escape route planning. These tapes remain visible in the dark for extended periods of time without use of a power supply and will clearly mark escape routes during power outages and emergencies.

Product applications:

- Emergency exit paths
- Exit door frames
- Fire exits
- Stairways
- Railings
- Fire protection equipment
- Fire alarms
- Door Signs
- Platforms
- Obstruction marking

5 Safety Signage

Effectively communicate important safety messages to employees and visitors.

Product applications:

- Hazard awareness
- Emergency exit points
- Chemical or gas hazards
- Physical hazards
- Safety equipment awareness
- Facility notice signs
- PPE
- Traffic control
- Low light requirements
- Indoor and long term outdoor options available

6 Floor Graphics

Are an excellent medium to communicate safety, warning and general information to people in your facilities.

Product applications:

- Forklift traffic marking
- Fire aisle marking
- Storage area marking
- Fire equipment area marking
- Machine boundaries
- Hazard areas
- Marking locations of first aid and safety equipment
- General workflow

7 Barricade Tape

Used to warn people of an area or situation containing a possible hazard.

Product applications:

- Construction sites
- Hazard control
- Traffic control
- Police or law enforcement
- Fire Departments
- Physical hazards
- Chemical or Biological Hazards

8 DOT/TDG

Dangerous good transportation marks promote public safety when dangerous goods are being handled, offered for transport or transported by road, rail, air, or water.

Product applications:

- Pails and smalls means of containment
- Gaylords and drums
- Tanker trailers
- Shipping boxes
- Transport trailers
- Bottles and bags

What is anti-slip tape?

Provides extra traction to help prevent slip and fall accidents

In the U.S.A., slips, trips and falls make up the majority of general industry accidents. They account for approximately 15% of all accidental deaths, and are the second leading cause behind motor vehicle accidents. Slips, trips and falls are one of most frequently-reported injuries, with approximately 25% of reported accident claims each year.*

Slips and trips can result from some kind of unintended or unexpected change in the contact between the feet and the ground or walking surface. Modifying walking surfaces is a way of preventing slip and trips. Installing pressure-sensitive abrasive strips can further improve safety and reduce risk of slipping and falling by increasing traction on the floor surface.

*Source: based on statistics from United States Department of Labor.

Excellent uses for anti-slip tape

- Stair treads, steps and platforms
- Wet or oily areas
- Transition areas from one floor surface to another
- Floor markings to denote hazards
- Indoor or outdoor slip hazards
- Tow motors, cherry pickers, construction equipment
- Loading docks, Shower areas, Catwalks, Ladders, Scaffolds

HOW TO CHOOSE Anti-Slip Tape

60 Grit Anti-Slip

This is our most commonly used grit level. Offers great indoor and outdoor anti-slip for most general purpose applications.

46 Grit Anti-Slip

Coarser than our 60-grit, this grade offers added traction and is great indoor and outdoor anti-slip for most general purpose applications.

36 Grit Anti-Slip

Offers a deeply textured surface and is recommended for areas with dirt and debris.

24 Grit Anti-Slip

Maximum deep texture and high traction. For areas with large amounts of dirt and debris.

Moppers Friend

36 grit anti-slip with modified surface to allow easy mopping and cleaning without “catching” strings.

Coarse Resilient

Deep embossed textured surface, designed for barefoot applications.

LIGHT MEDIUM HEAVY

60 GRIT → TEXTURE → 24 GRIT

Correct installation procedure

Surface Preparation

It is very important that the surface the tape is being adhered to is free from all contamination such as dirt, dust, grease and oil. A combination of 50/50 alcohol and water solution is usually adequate for removing most contamination. The wiper/cloth should be changed frequently (white cloth recommended). Heavy accumulation may require more aggressive cleaning techniques.

Temperature

Temperature is a critical factor in adhesive bonding and is often over-looked. All our tape products are intended to be applied in temperatures of not less than 50°F (10°C) and not more than listed on their data sheets. In general the closer to room temperature the better the bonding.

Pressure

Tape products should be smoothed down with 15 psi of pressure or more. This will aid in adhesive “wet out” and result in better bonding.

Time

Once the tape has been applied, the adhesive bond will continue to strengthen as it has time to cure. The ambient temperature will affect this bonding time (the colder the slower), but as a general rule good bonding will not be fully achieved for 24-48 hours after the application. Full bond strength will be reached at 72 hours (70°F).

Adhesion Promoters

Some very difficult surfaces may require the use of adhesion promoters to aid in proper bonding. This would be true for low surface energy materials and very porous surfaces. Promoters should be applied per manufacturer’s instructions and must be allowed to fully dry prior to tape application. For porous concrete surfaces you may want to try a Dap® Weldwood® type product for aiding in bonding. Refer to manufacturer’s instructions and SDS sheet for proper handling.

Test

As with most products we highly recommend that you test a small sample of product in its intended use prior to complete installation. Some applications prove to be more difficult and require additional steps to achieve the desired results.

Support

If you would like any assistance or product recommendations, please feel free to contact us at support@incomdirect.com

Premium Grade Anti-Slip Tape

Gator Grip® Traction Tape is our premium brand anti-slip system that helps ensure an OSHA compliant workplace. Constructed from a thick base layer and impregnated with an aggressive 60-grit mineral abrasive compound. The backing has an aggressive acrylic adhesive system for longevity that will form a strong, water-proof bond to most any clean, dry surface while still being temporarily repositionable during the application process.

Gator Grip® is a great choice for both indoor and outdoor environments offering our highest wear resistance and weatherability. Recommended product for long term and OEM applications. Gator Grip® Traction Tape is certified by the National Flooring Safety Institute 101-A "High- Traction", and meets or exceeds OSHA 1910.24, 1910.26 and ANSI B101.1. Gator Grip® offers excellent chemical and oil resistance for a wide variety of applications.

Military & Marine Grade Anti-Slip Tape

Our highest performance grit product, Military & Marine Grade anti-slip grit tape offers a large durable abrasive particle providing a slip-resistant surface for improved safety in marine and severe outdoor environments. Product has been tested and used in Military (MIL-PRF-24667C Type XI) & Marine (NAVSEA Approval #05S/2014-162). This aggressive, premium anti-slip grit tape is commonly used in marine, workboat, heavy construction and mining equipment applications.

Follow application instructions to ensure best results. Apply only to a clean, dry, smooth surface above 50°F (10°C).

Custom rolls and sheet sizes available. Call for more details.

Complies with: MIL-PRF-24667C Type XI and NAVSEA Approval #05S/2014-162.

Premium Grade Colored Anti-Slip Tape

Our line of Gator Grip® Colored anti-slip products are an effective way to offer visual warning of a slip and fall hazard, while offering the same aggressive premium grit features found on our Gator Grip® products.

The surface is an aggressive mineral abrasive compound on a thick liner. Tape will adhere to most any clean, dry surface with an acrylic adhesive system. Tape and adhesive are water, chemical and oil resistant for use in both indoor & outdoor applications.

Try our popular yellow/black hazard striped tape for maximum visual warning and anti-slip protection on stair nosings.

Premium Grade Anti-Slip Cleats

Our Gator Grip® die cut shapes are made from the same material as our Gator Grip® products, but pre-cut to give a finished look on your floor or equipment. All cleats come with rounded corners to reduce tape lifting and flagging. The acrylic adhesive system forms a strong bond to most any clean, dry surface. Gator Grip® cleats work well in both indoor and outdoor applications. Water, chemical and oil resistant for indoor and outdoor usage.

Gator Grip® cleats are NFSI certified as a "High Traction" surface and meet or exceed OSHA 1910.24 and 1910.26. Custom die cut shapes and printing are available to suit your application.

Stadium Track High Visibility Anti-Slip Tape

Public buildings, stadiums, arenas and parking garages are major areas of concern for slip and fall accidents. Our Stadium Track Tape was developed for these high traffic, high visibility applications. The tape has a muted yellow appearance that adds a visible safety feature, and it maintains its appearance because of the black particles mixed in with the yellow surface. Even after heavy foot traffic the tape will still not look dirty.

The 46-grit anti-slip surface offers a high level of traction and durability. If public safety is part of your program, this is a great product choice. Great for both indoor and outdoor applications and offers excellent water and weather resistance. Meets or exceeds ANSI B101.1.

Premium Grade Anti-Slip Footprints

Add a distinctive look to slip and fall prevention program with our die cut footprint traction cleats. Made of the same material as our Gator Grip® tapes and standard cleats, these footprints offer a clear directional pathway indicator for plants, offices or other applications while offering a high degree of anti-slip protection. Try our standard black, safety yellow, or high visibility glow options to fit your particular application.

The surface is an aggressive mineral abrasive compound on a thick base layer. Acrylic adhesive system will adhere to most any clean, dry surface. Cleats are water, chemical and oil resistant for use in both indoor & outdoor applications.

Heavy Duty 36-Grit Anti-Slip Tape

Heavy foot traffic and dirty work environments can clog up standard grit products with mud, oil, saw dust, liquids and grease. Our Extra Coarse Gator Grip® offers a very deeply textured (36-grit) surface to continue to offer non-slip protection, even in the dirtiest conditions. Tape can even be spray painted and still maintain a anti-slip surface.

Tape is water-proof for both indoor and outdoor applications, and offers excellent hydrocarbon resistance. This tape has a very aggressive grit surface and is recommended for areas with heavy debris only.

Custom slitting and die cut shapes for OEM applications also available. Great for mud, saw dust, snow and other outdoor applications. Meets or exceeds OSHA 1910.24, 1910.26 and ANSI B101.1.

Super Coarse XP 24-Grit Anti-Slip Tape

Looking for the ultimate in high traction? Choose our Gator Grip® Super Coarse XP non-skid tape. This product has a large (24-grit) mineral abrasive surface offering our highest level of slip resistance.

Super Coarse XP is a great choice for areas where large amounts of debris are present resulting in reduced surface traction. Tape is suitable for both indoor and outdoor applications and has an aggressive permanent pressure sensitive adhesive system.

Meets or exceeds OSHA 1910.24, 1910.26 and ANSI B101.1.

Stock No.	Description	Size
SG2402B	Super Coarse Anti-SlipTape	2" x 40'
SG2404B	Super Coarse Anti-SlipTape	4" x 40'
SG2406B	Super Coarse Anti-SlipTape	6" x 40'
SG2412B	Super Coarse Anti-SlipTape	12" x 40'

Foil Backed Anti-Slip Tape

Our conformable foil backed anti-slip tape is designed specifically for heavy duty textured surface and stair nosing applications. The foil carrier allows for excellent conformability and will hold its shape to most any embossed or textured surface with its aggressive adhesive.

This product works great on steel tread plate, stair nosing, uneven concrete and most uneven surfaces. Tape has an coarse 46-grit surface.

Great for indoor and outdoor applications with excellent weatherability and water resistance.

Custom slit widths and die cut applications also available. Meets or exceeds OSHA 1910.24, 1910.26 and ANSI B101.1.

Stock No.	Description	Size

Anti-Slip Glow-in-the-dark Tape

Our Photoluminescent Anti-Slip traction tape is perfect for use in emergency exit routing areas such as stairwells, laneways, fire aisle and exits. The high traction surface is combined with a glow in the dark carrier that will aid in finding important emergency routes, equipment and exits during power outage or emergency conditions.

This product has a similar surface and adhesion to our colored and black anti-slip products, but an added safety glow feature. Our tape offers a "GLOW" that is readily visible to the light adjusted eye for up to 6 hours, with the strongest results in the first 60-minutes. Product has an aggressive acrylic adhesive system that will bond to most any clean dry surface.

MEETS OR EXCEEDS STANDARDS:

- DIN 67510
- ASTM E2072-14
- ISO 15370
- EU Marine Equipment Directive
- IMO Resolution A. 752 (18)
- PSPA class B

Stock No.	Description	Size
SG4202PH	Glow-in-the-Dark Anti-Slip Tape	2" x 60'
SG4204PH	Glow-in-the-Dark Anti-Slip Tape	4" x 60'
SG4206PH	Glow-in-the-Dark Anti-Slip Tape	6" x 60'
SG4226PHS50	Glow-in-the-Dark Anti-Slip Cleat (50 per pack)	6" x 24"

Check with local, state/provincial and federal authorities to determine suitability of this photoluminescent product in any egress or emergency exit applications.

'Mop Friendly' Slip-Resistant Tape

Looking to provide an enhanced level of anti-slip protection, but still need to mop the surface for cleaning? Choose our "Mop Friendly" slip-resistant product. We have taken our premium grade anti-slip tape and modified the grit particles to allow a mop to pass over without "catching" strings.

Tape has an aggressive acrylic adhesive system that will bond to most any clean, dry surface and offers a virtually water-proof long term bond.

An excellent product choice for areas where frequent cleaning by mopping is common. Excellent product choice for the marine and boating industries.

Stock No.	Description	Size
SG5102MB	Black Mop Friendly Slip-Resistant Tape	2" x 60'
SG5104MB	Black Mop Friendly Slip-Resistant Tape	4" x 60'
SG5106MB	Black Mop Friendly Slip-Resistant Tape	6" x 60'

Embossed Coarse Resilient Slip-Resistant Tape

Embossed Coarse Resilient Slip-Resistant Tape works great in the office, plant, locker room or areas with bare foot traffic.

This product is not like bath products you would see at the hardware store. This surface has a deep embossed surface that will perform in heavier duty applications, while still being comfortable for bare foot traffic.

We recommend this product in office environments and light plant uses, it can be very easily cleaned and will not trap dirt the way normal grit products can. Surface can also be easily mopped.

What is floor marking tape?

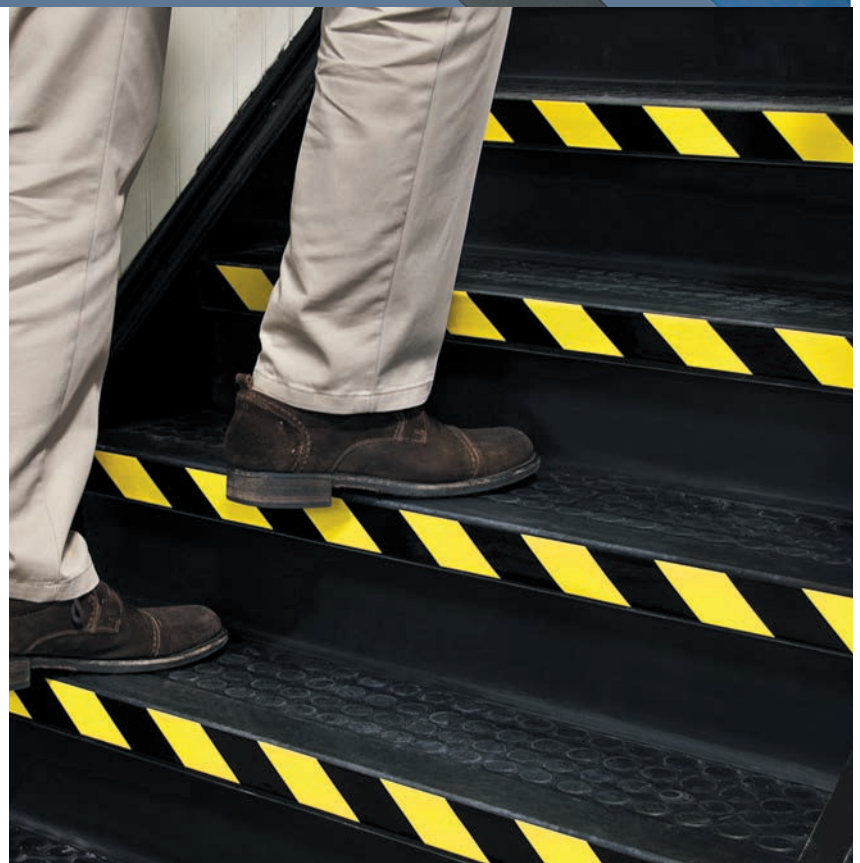

Improve safety, efficiency and productivity

Floor marking tapes are adhesive tapes used to mark hazards, divide spaces, create aisles, or provide directions. They are commonly used in industrial and manufacturing facilities for floor marking. They are made of multiple different materials, and vary in thickness for a wide range of durability options. Most tapes come in a variety of color options and even hazard stripe warning patterns to meet ANSI requirements and other safety standards.

Tapes are an effective replacement for paints. Tapes are much faster and easier to install and replace. This will dramatically reduce down times when compared to painting aisles and rails. Many floor tapes are scuff and break resistant, unlike paints that will chip and scratch off.

Excellent uses for floor marking tape

- Forklift traffic marking
- Fire aisle marking
- Workflow Marking
- Hazard Marking
- Machine boundaries
- First Aid and Safety Equipment Areas
- Eyewash Stations Areas
- Fire Equipment Areas
- Pipe identification

HOW TO CHOOSE Floor Marking Tape

Conformable Tape

General purpose tape with a rubber adhesive system. Available in a large selection of colors and Hazard Stripe patterns.

Laminated Tape

Our conformable tape with an added top film for extra durability. Available in Hazard Stripe patterns.

TuffMark® Tape

Highest durability level in conformable floor marking tapes. Offers great wear, chemical and abrasion resistance along with high tack adhesive strength, while maintaining a low profile design and clean removal.

Armor Stripe

An extremely durable semi rigid marking system. A thick 0.055" poly material is used to provide maximum longevity. Beveled edges reduce wheel impact on forklifts and make cleaning easier.

Worded Floor Tape

Offers addition safety and informational messages to your facility while maintaining anti-slip compliance.

Correct installation procedure

Surface Preparation

It is very important that the surface the tape is being adhered to is free from all contamination such as dirt, dust, grease and oil. A combination of 50/50 alcohol and water solution is usually adequate for removing most contamination. The wiper/cloth should be changed frequently (white cloth recommended). Heavy accumulation may require more aggressive cleaning techniques.

Temperature

Temperature is a critical factor in adhesive bonding and is often over-looked. All our tape products are intended to be applied in temperatures of not less than 50°F (10°C) and not more than listed on their data sheets. In general the closer to room temperature the better the bonding.

Pressure

Tape products should be smoothed down with 15 psi of pressure or more. This will aid in adhesive "wet out" and result in better bonding.

Time

Once the tape has been applied, the adhesive bond will continue to strengthen as it has time to cure. The ambient temperature will affect this bonding time (the colder the slower), but as a general rule good bonding will not be fully achieved for 24-48 hours after the application. Full bond strength will be reached at 72 hours (70°F).

Adhesion Promoters

Some very difficult surfaces may require the use of adhesion promoters to aid in proper bonding. This would be true for low surface energy materials and very porous surfaces. Promoters should be applied per manufacturer's instructions and must be allowed to fully dry prior to tape application. For porous concrete surfaces you may want to try a Dap® Weldwood® type product for aiding in bonding. Refer to manufacturer's instructions and SDS sheet for proper handling.

Test

As with most products we highly recommend that you test a small sample of product in its intended use prior to complete installation. Some applications prove to be more difficult and require additional steps to achieve the desired results.

Support

If you would like any assistance or product recommendations, please feel free to contact us at support@incomdirect.com

Aisle Marking Conformable Tape

We offer a wide selection of quality aisle marking and pipe banding tapes. Our aisle marking tapes are made from a durable film with a rubber adhesive system that will adhere to most any clean, dry surface.

This matte smooth conformable tape that is great for marking hazards on floors, walls and equipment. Commonly used in aisle demarcation, color coding and pipe banding applications.

All tapes are made in a wide array of OSHA colors that meet ANSI Z535.1 and offer excellent durability and chemical resistance.

Safety Red

Fire protection equipment and apparatus, danger signs, containers of flammable liquids, lights at barricades, stop buttons/switches.

Safety Orange

Signs and equipment designating dangerous or energized machines/equipment.

Safety Yellow

Specific physical hazards including falling, tripping and striking and designating caution.

Safety Green

Safety information and first aid equipment.

Safety Blue

Information not immediately safety related (i.e. property policies).

Purple, Gray, Black and White

The significance of these colors may be defined by the end user.

TuffMark®

Ultra Durable Floor Marking Tape

TuffMark® provides a long lasting solution for marking floors, aisles, walkways and work flow in your facilities. This extra-tough, low profile, easy to apply Floor Marking product is made with heavy duty materials making this tape highly durable, as well as abrasion and chemical resistant.

The rigid construction makes this tape easy to install as well as easy to clean and maintain. The aggressive adhesive will bond to most floors making this tape resistant to tearing, wrinkling or lifting even under heavy forklift traffic. Once applied, the low profile design makes this tape a great choice for use in areas with forklift, hand truck or pedestrian traffic. Removes from most floor surfaces cleanly without chipping, tearing or leaving unsightly adhesive residue.

TuffMark® is available in a wide selection of sizes and can be customized with a printed message or specific color.

TuffMark® Standards:

- ANSI Standard Z535.1 for color
- Average dry BPN: 125 (Dynamic slip resistance using ASTM E303-93 (2013) pendulum test method)
- Average dry dynamic coefficient of friction: Overall average: Dry 0.60 (ANSI A137.1 flooring slip resistance test - dry)

Armadillo Tape

Ultra Durable Floor Tape

In response to customer demand for a longer wearing floor tape product we have developed our line of ultra durable Armadillo tapes. These tapes offer our best level of durability for indoor and outdoor applications.

The tape is constructed on a thick reinforced carrier with an aggressive weather-proof adhesive system. The surface is a mild abrasive surface that is durable, slip-resistant and also has low level reflective properties. Tape will adhere to a wide variety of industrial surfaces including smooth concrete, asphalt, wood and steel.

Low profile design will ensure that the tape does not present a hazard to fork truck traffic or pedestrians. Tape can be easily cleaned with standard industrial cleaning machines and procedures.

Safety Message

Floor Tape

Worded floor tapes are a great way to effectively and permanently communicate safety messages and hazards to your employees and visitors.

These tapes are constructed for long term durability. All tapes have a slip resistant clear over-lamination to offer long-term protection to the printed messages. All tapes provide a slip resistant surface in compliance with UL 410-COF for floor graphics.

Custom text and graphics also available. Contact customer service for more details.

What are 5S Lean Workplace Markings?

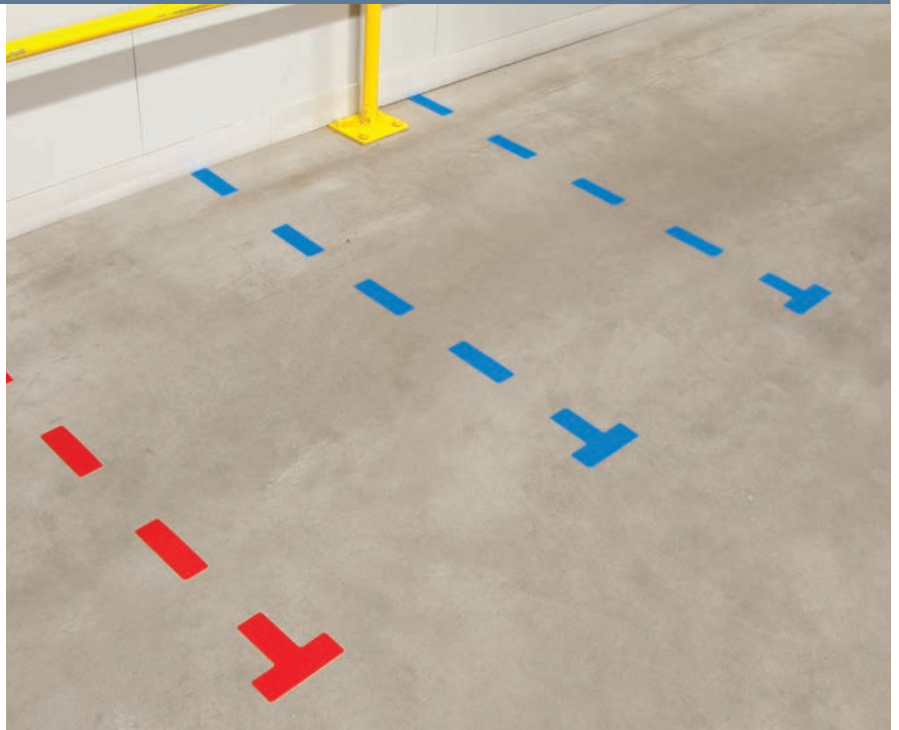

Improve safety, efficiency
and productivity

5S is a workplace organization method used in industrial manufacturing around the world. These markers aid in organizing a work space for efficiency, effectiveness, and safety by identifying and storing the items used, maintaining the area and items, and sustaining the new order.

Excellent Uses for 5S Lean Markers

- Assisting in 5S compliance
- Directing work flow
- Sorting and organizing
- Warehousing
- Marking product locations

HOW TO CHOOSE 5S Lean Markers

Textured Markers

These markers are made with a thick textured anti-slip lamination. This provides extended durability and will stand up to heavy pedestrian traffic.

TuffMark Markers

Tuff Mark® provides a long lasting solution for 5S Lean Marking. This extra tough, low profile, easy to apply Floor Marking product is made with heavy duty materials making these markers highly durable, as well as abrasion and chemical resistant. Designed for use in areas with forklift, hand truck, or pedestrian traffic.

Armor Stripe Markers

An extremely durable semi rigid marking system. A thick 0.055" poly material is used to provide maximum longevity. Beveled edges reduce wheel impact on forklifts and make cleaning easier. Our highest durability level for 5S Markers.

Correct installation procedure

Surface Preparation

It is very important that the surface the tape is being adhered to is free from all contamination such as dirt, dust, grease and oil. A combination of 50/50 alcohol and water solution is usually adequate for removing most contamination. The wiper/cloth should be changed frequently (white cloth recommended). Heavy accumulation may require more aggressive cleaning techniques.

Temperature

Temperature is a critical factor in adhesive bonding and is often over-looked. All our tape products are intended to be applied in temperatures of not less than 50°F (10°C) and not more than listed on their data sheets. In general the closer to room temperature the better the bonding.

Pressure

Tape products should be smoothed down with 15 psi of pressure or more. This will aid in adhesive "wet out" and result in better bonding.

Time

Once the tape has been applied, the adhesive bond will continue to strengthen as it has time to cure. The ambient temperature will affect this bonding time (the colder the slower), but as a general rule good bonding will not be fully achieved for 24-48 hours after the application. Full bond strength will be reached at 72 hours (70°F).

Adhesion Promoters

Some very difficult surfaces may require the use of adhesion promoters to aid in proper bonding. This would be true for low surface energy materials and very porous surfaces. Promoters should be applied per manufacturer's instructions and must be allowed to fully dry prior to tape application. For porous concrete surfaces you may want to try a Dap® Weldwood® type product for aiding in bonding. Refer to manufacturer's instructions and SDS sheet for proper handling.

Test

As with most products we highly recommend that you test a small sample of product in its intended use prior to complete installation. Some applications prove to be more difficult and require additional steps to achieve the desired results.

Support

If you would like any assistance or product recommendations, please feel free to contact us at support@incomdirect.com

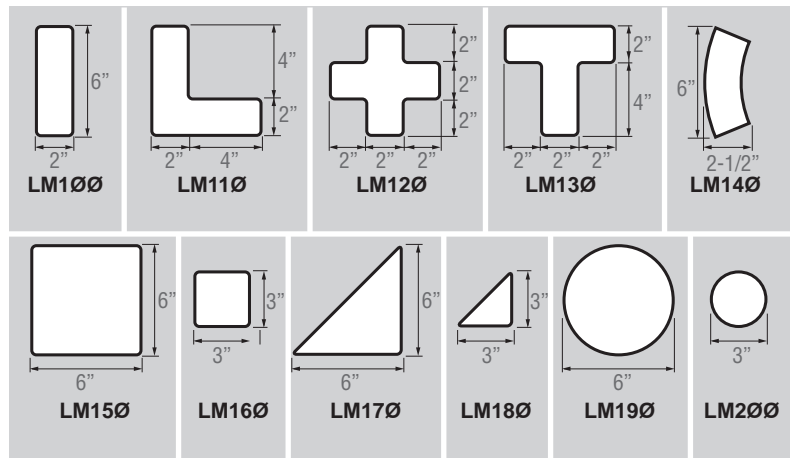

Textured Anti-Slip

5S Lean Markers

These markers are specifically designed for use in "Lean Manufacturing" 5S applications for aiding in floor layout, sorting and workflow.

These markers are made with a thick textured anti-slip lamination. This provides extended durability and will stand up to heavy pedestrian traffic. The aggressive adhesive backing will work on most clean, dry and smooth floors.

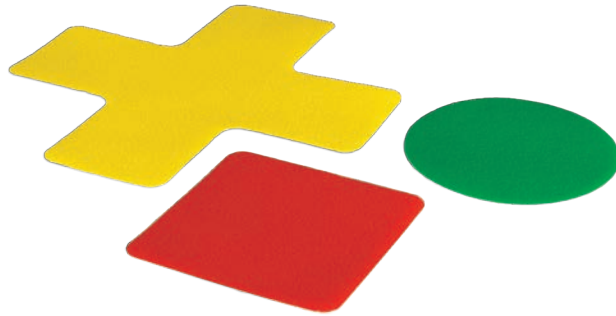

Textured anti-slip surface provides extended durability.

HOW TO ORDER:

SELECT SIGN - LM100		SELECT COLOR CODE - W				ADD TOGETHER - LM100W	
Color	White	Black	Yellow	Red	Blue	Green	Orange
Code	W	K	Y	R	B	G	N

Note: Markers are sold 25 pieces per package.

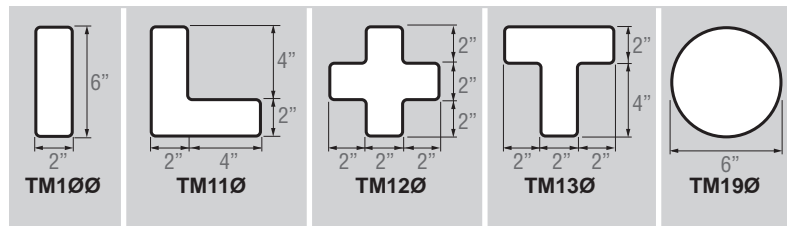

TuffMark®

Laminated 5S Lean Markers

TuffMark® provides a long lasting solution to aid in floor layout, sorting and workflow to help comply with 5S Lean manufacturing standards. This extra-tough, low profile, easy to apply Floor Marking product is made with heavy duty materials making these markers highly durable, as well as abrasion and chemical resistant.

These markers are made with the same material as our TuffMark® tapes and will match both construction and color when used together.

Extra-tough, low profile heavy duty abrasion and chemical resistant material.

HOW TO ORDER:

SELECT SIGN - TM100		SELECT COLOR CODE - W				ADD TOGETHER - TM100W	
Color	White	Black	Yellow	Red	Blue	Green	Orange
Code	W	K	Y	R	B	G	N

Note: Markers are sold 20 pieces per package.

TUFFMARK®

ArmorStripe

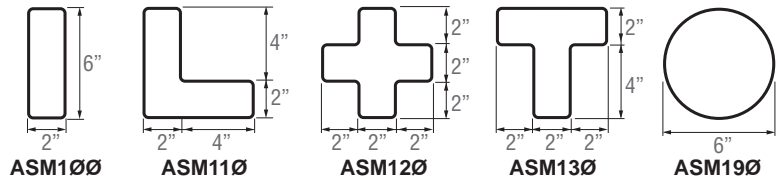

Ultra Durable Tapered Edge 5S Lean Markers

ArmorStripe offers an extremely durable system to aid in floor layout, sorting and workflow for 5S Lean manufacturing standards.

These markers are made from a through-color solid 0.055" thick rigid polyethylene surface with an ultra tacky heavy coat weight adhesive backing. They will adhere to most any clean smooth surface with a very high tack bond while offering a low residue removal from most applications.

Edges of all shapes have been tapered to reduce wheel impact. Solid through-color plastic offers extended durability.

Edges of all shapes have been tapered to reduce wheel impact. Solid through-color plastic offers extended durability.

HOW TO ORDER:

SELECT SIGN - ASM100	SELECT COLOR CODE - W				ADD TOGETHER - ASM100W		
Color	White	Black	Yellow	Red	Blue	Green	Orange

5S Shadow Board Storage Organizers

Organize your workspace by clearly marking where equipment should be stored and easily notice when something is missing. These shadow boards adopt the 5S method of organization by creating a designated space for equipment and tools. Employees can be sure they are following the correct organizational procedure when carrying out housekeeping tasks.

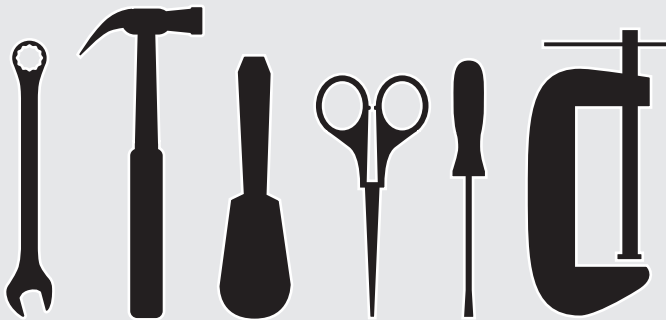

The 5S shadow board is made from 5mm thick Aluminum Composite Material (ACM) with a durable print finish. All hanger hardware for the equipment are included and come with assembly instructions.

Shadow boards are shipped with equipment hanging hardware included, that is easily installed by the user.

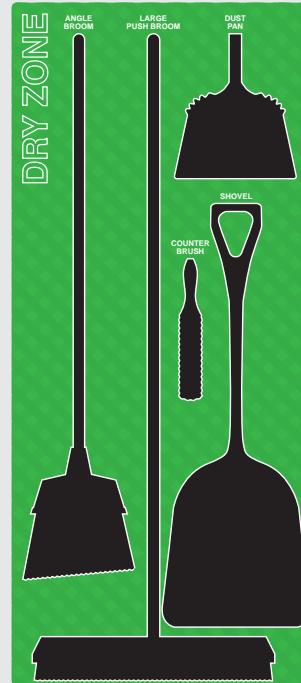

Looking for custom options?

If you need a custom option, we can work directly with you to create a shadow board for your tools or specialized equipment. They can be designed to any size, shape or color to suit your workplace needs.

What is Glow-in-the-dark Tape?

Designed for added safety during blackout emergencies

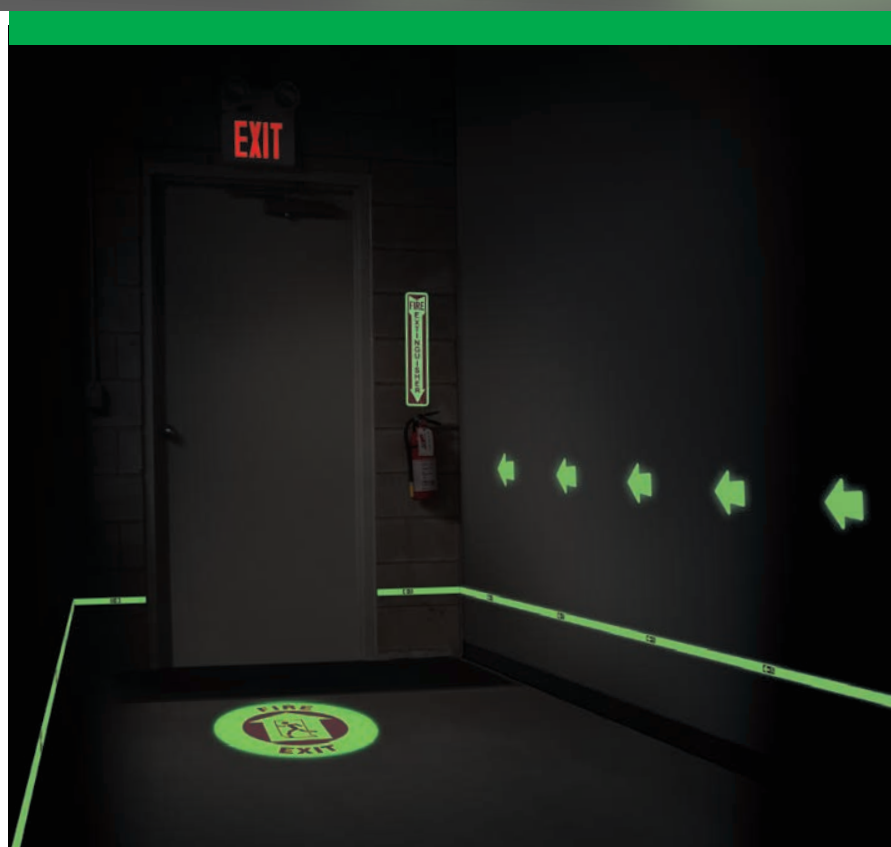

Photoluminescent tape is designed for added safety during blackouts, evacuations and other emergencies. This glow-in-the-dark tape is commonly used to help improve the safety in warehouses, manufacturing facilities, and even on emergency equipment.

Excellent uses for Glow-in-the-dark tape

- Emergency exit paths
- Exit door frames
- Stairways
- Railings
- Fire protection equipment
- Fire alarms
- Platforms
- Obstructions

Check with local, state/provincial and federal authorities to determine suitability of this photoluminescent product in any egress or emergency exit applications.

EXIT

HOW TO CHOOSE Glow Tape

Plain Glow-in-the-dark

Industrial safety grade available in assorted widths.

Hazard Glow-in-the-dark

Our industrial grade photoluminescent tape with added hazard stripes. Enhances visual awareness during both standard lighting conditions as well as black out and emergency situations.

Anti-Slip Glow-in-the-dark

Our industrial grade photoluminescent tape with a top coat of our clear Gator Grip® anti-slip tape. Designed for platforms, floors, stairwells and other emergency exit route floors where added slip resistance is needed.

Check with local, state/provincial and federal authorities to determine suitability of this photoluminescent product in any egress or emergency exit applications.

Correct installation procedure

Surface Preparation

It is very important that the surface the tape is being adhered to is free from all contamination such as dirt, dust, grease and oil. A combination of 50/50 alcohol and water solution is usually adequate for removing most contamination. The wiper/cloth should be changed frequently (white cloth recommended). Heavy accumulation may require more aggressive cleaning techniques.

Temperature

Temperature is a critical factor in adhesive bonding and is often over-looked. All our tape products are intended to be applied in temperatures of not less than 50°F (10°C) and not more than listed on their data sheets. In general the closer to room temperature the better the bonding.

Pressure

Tape products should be smoothed down with 15 psi of pressure or more. This will aid in adhesive "wet out" and result in better bonding.

Time

Once the tape has been applied, the adhesive bond will continue to strengthen as it has time to cure. The ambient temperature will affect this bonding time (the colder the slower), but as a general rule good bonding will not be fully achieved for 24-48 hours after the application. Full bond strength will be reached at 72 hours (70°F).

Adhesion Promoters

Some very difficult surfaces may require the use of adhesion promoters to aid in proper bonding. This would be true for low surface energy materials and very porous surfaces. Promoters should be applied per manufacturer's instructions and must be allowed to fully dry prior to tape application. For porous concrete surfaces you may want to try a Dap® Weldwood® type product for aiding in bonding. Refer to manufacturer's instructions and SDS sheet for proper handling.

Test

As with most products we highly recommend that you test a small sample of product in its intended use prior to complete installation. Some applications prove to be more difficult and require additional steps to achieve the desired results.

Support

If you would like any assistance or product recommendations, please feel free to contact us at support@incomdirect.com

Anti-Slip Glow-in-the-dark Tape

Our photoluminescent anti-slip traction tape is perfect for use in emergency exit routing areas such as stairwells, laneways, fire aisle and exits. The high traction surface is combined with a glow in the dark carrier that will aid in finding important emergency routes, equipment and exits during power outage or emergency conditions.

This product has a similar surface and adhesion to our colored and black anti-slip products, but an added safety glow feature. Our tape offers a "GLOW" that is readily visible to the light adjusted eye for up to 6 hours, with the strongest results in the first 60-minutes. Product has an aggressive acrylic adhesive system that will bond to most any clean dry surface.

MEETS OR EXCEEDS STANDARDS:

- DIN 67510
- ASTM E2072-14
- ISO 15370
- EU Marine Equipment Directive

Check with local, state/provincial and federal authorities to determine suitability of this photoluminescent product in any egress or emergency exit applications.

Directional Fire Exit Glow-in-the-dark Tape

Our photoluminescent directional emergency exit tape is intended to be installed close to ground level, to be visible where a person would be crawling under smoke. Tapes will "GLOW" 6+ hours..

MEETS OR EXCEEDS STANDARDS:

- DIN 67510
- ASTM E2072-14
- ISO 15370
- EU Marine Equipment Directive
- IMO Resolution A. 752 (18)
- PSPA class B

Stock No.	Description	Size
GT130EXL	Exit Left	1" x 30'
GT130EXR	Exit Right	1" x 30'

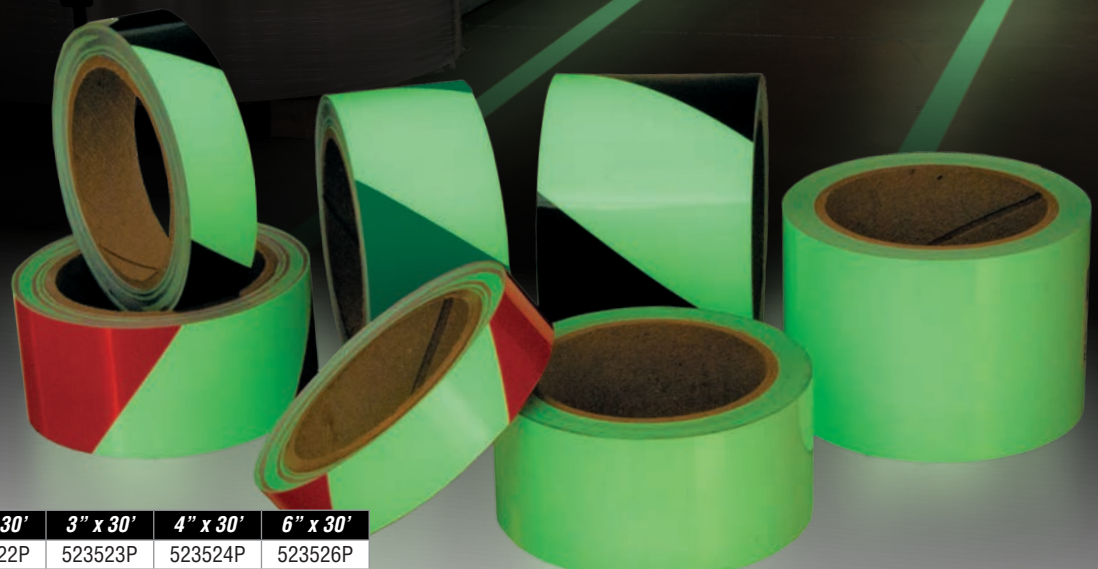

Check with local, state/provincial and federal authorities to determine suitability of this photoluminescent product in any egress or emergency exit applications.

Hazard & Plain Glow-in-the-dark Tape

Our photoluminescent tapes will "GLOW" 6+ hours. This product comes with an aggressive permanent pressure sensitive adhesive that will adhere to most any clean, dry surface.

MEETS OR EXCEEDS STANDARDS:

- DIN 67510
- ASTM E2072-14
- ISO 15370
- EU Marine Equipment Directive

What is barricade tape?

Used to warn people of an area or situation containing a possible hazard

Barricade tape acts as a minor impediment to prevent accidental entrance to that area or situation that could result in harm or liability. The tape is often wrapped and affixed as a visual warning sign and demarcation, for instance against entering a dangerous area, such as an industrial or commercial building site, or a roadworks construction site. Barricade tape is also known as construction tape, barrier tape, or caution tape.

Common uses for barricade tape

- Construction sites
- Hazard Control
- Traffic control
- Police or Law enforcement
- Fire Departments
- Physical hazards
- Chemical or Biological Hazards

HOW TO CHOOSE Barricade Tape

Value Grade

Our best value thinner gauge film for general light duty usage.

Contractor Grade

A great blend of performance and value for the contractor markets.

Plus Grade

A medium thickness film built for extended stability in windy conditions.

Heavy Duty Grade

Our thickest grade poly film for the best durability in a wide range of applications.

Reinforced Grade

Our reinforced product offers the ultimate in durability under the toughest conditions.

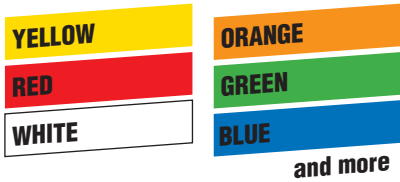

Custom Printed

Add a distinctive touch to your job site while promoting your company at the same time. We offer a complete customization program. Add your company's name and logo to your barricade tape with your choice of message.

Please contact your customer service representative to start your custom barricade tape project today.

Utility Grade Barricade Tape

Our PrimeGuard Utility Grade barricade tapes are designed to provide visual warning of buried utility lines and pipes underground. The PrimeGuard legends are printed on our thickest grade of poly film to resist fading and degrading even under the toughest conditions.

All of our industry common legends are available in both 3" x 1000' and 6" 1000' foot rolls depending on the job requirements.

All 3"x1000' rolls packaged 12 per case on a 3" core. All 6"x1000' rolls packaged 6 per case on a 3" core.

Reinforced Grade Barricade Tape

Our reinforced PrimeGuard barricade tape offers the ultimate in durability on the jobsite.

Printed on a material similar to that used in manufacturing sandbags, these tapes do not stretch or break under normal stress conditions. PrimeGuard reinforced tapes will keep their shape in the rain and can withstand very strong winds. Our Toughest Barricade Tape.

Currently available in both CAUTION and DANGER legends. Rolls sold in full case only, 3" x 500' 12 rolls/case.

Woven Polypropylene Barricade Tape

Woven polypropylene barrier tape offers a strong, reusable product to help mark safety hazards in the workplace. This tape is made from a thick woven polypropylene scrim that will withstand high winds and offer long-term durability in outdoor applications. Material complies with UL 723, data sheet available on request.

Due to the strong nature of this product it can be reused to save cost and reduce environmental impact.

Product is available in an assortment of sizes and colors.

What is Reflective tape?

Flexible retroreflective material primarily used to increase nighttime visibility for safety

The material consists of retroreflective glass beads, microprisms, or encapsulated lenses sealed onto a plastic substrate. All of these different material options are used to shine light back to the light source to make people aware of potential hazards. Many different colors and degrees of reflection intensity are available for various applications.

Excellent uses for reflective tapes

- Tractor Trailers and Highway vehicles
- Fleet vehicle markings and graphics
- Property and gate markers
- Emergency equipment
- Trailers
- Bollards and railings
- Loading docks
- Ramps
- Entrances and exits
- Construction equipment
- Signs
- Low hanging hazards

HOW TO CHOOSE Reflective Tape

Engineer Grade

Entry level general purpose reflectivity (ASTM D-4956 Type I). Offers vibrant daytime visibility and reflectivity for increased awareness at night.

Flexible Vehicle Grade

This product has the same reflective properties as our standard Engineer Grade, but with added flexibility. This allows the tape to conform and adhere to curves and contours.

High Intensity Grade

High Intensity grade is an excellent choice for marking anything that requires a high level of night time visibility, with a long term life cycle. High Intensity product has a reflective value of over 8 times that of our standard engineer grade products. Intended for application on relatively flat surfaces only. Product meets or exceeds ASTM D-4956 Type III/IV.

Neonbrite Grade

Neonbrite fluorescent reflective offers the highest levels of night time reflectivity, coupled with an extremely fluorescent lime color that stands out in day time applications as well. The tape has an aggressive adhesive backing with 10 year durability. Product meets or exceeds ASTM D-4956 Type VIII. Approximately 11 times more reflective than Engineer Grade.

Conspicuity Tape

Conspicuity tape is designed to provide high visibility for road and highway vehicles. Available in Red/White versions for DOT-C2 applications, and Yellow for school bus vehicles.

Reflex Reflectors

Our reflectors are designed to meet SAE A DOT requirements and help increase visibility on trailers and other vehicles.

Correct installation procedure

Surface Preparation

It is very important that the surface the tape is being adhered to is free from all contamination such as dirt, dust, grease and oil. A combination of 50/50 alcohol and water solution is usually adequate for removing most contamination. The wiper/cloth should be changed frequently (white cloth recommended). Heavy accumulation may require more aggressive cleaning techniques.

Temperature

Temperature is a critical factor in adhesive bonding and is often over-looked. All our tape products are intended to be applied in temperatures of not less than 50°F (10°C) and not more than listed on their data sheets. In general the closer to room temperature the better the bonding.

Pressure

Tape products should be smoothed down with 15 psi of pressure or more. This will aid in adhesive "wet out" and result in better bonding.

Time

Once the tape has been applied, the adhesive bond will continue to strengthen as it has time to cure. The ambient temperature will affect this bonding time (the colder the slower), but as a general rule good bonding will not be fully achieved for 24-48 hours after the application. Full bond strength will be reached at 72 hours (70°F).

Adhesion Promoters

Some very difficult surfaces may require the use of adhesion promoters to aid in proper bonding. This would be true for low surface energy materials and very porous surfaces. Promoters should be applied per manufacturer's instructions and must be allowed to fully dry prior to tape application. For porous concrete surfaces you may want to try a Dap® Weldwood® type product for aiding in bonding. Refer to manufacturer's instructions and SDS sheet for proper handling.

Test

As with most products we highly recommend that you test a small sample of product in its intended use prior to complete installation. Some applications prove to be more difficult and require additional steps to achieve the desired results.

Support

If you would like any assistance or product recommendations, please feel free to contact us at support@incomdirect.com

Engineer Grade Reflective Tape

Looking for increased awareness? Try our line of Engineer Grade Reflective Tapes. These tapes offer vibrant daytime visibility with reflective properties for nighttime use.

All solid color tape is rated for use outdoors for a 7-year life span. Tape has an aggressive adhesive that will adhere to almost any clean, dry, smooth surface and meets ASTM D-4956 Type I.

Hazard striped products have a protective lamination to ensure the printed stripe will not wear off. Tape comes with removable release liner. This product is not intended for vehicle application.

Custom printing and conversion also available. We also offer our entire range of reflective products in large format rolls. Striped product is not intended for long-term outdoor applications.

High Intensity Reflective Tape

Superbrite high intensity reflective is an excellent choice for marking anything that requires a high level of night time visibility for a long term life cycle. The tape has an excellent entrance angularity and high intensity micro-prismatic surface. An aggressive adhesive system will adhere to most any clean, dry surface. Intended for application on relatively flat surfaces only. Product meets or exceeds ASTM D-4956 Type III/IV. Striped product is not intended for long-term outdoor applications.

Approximately 8 times more reflective than Engineer Grade.

Imprint with your own logo. Ask for details.

Conspicuity DOT-C2 Reflective Tape

Exceeds the requirements of NHTSA (49 CFR 571), and every strip carries the DOT-C2 certification for compliance. This conspicuity tape meets the industry's highest visibility guidance in wet or dry weather conditions with full reflective strength from distances of 1,000 feet or more. Easy to apply, our tape sticks to a variety of surfaces including fiberglass, aluminum and painted steel (please make sure surface is clean, dry and oil free before application).

Please contact customer service for information on our custom imprint program.

School Bus Yellow Conspicuity Tape

Our yellow school bus conspicuity reflective tape is designed for improving vehicle detection and recognition. It is a high quality, durable, microprismatic retroreflective material with a permanent pressure sensitive adhesive that offers short-term repositionability during application. The single layered construction does not require an edge sealing compound. 7 year outdoor durability on vertical exposure only. Suited for applications to most metals and painted surfaces.

Meets current application requirements for the following specifications:
 US: NHTSA FMVSS 131 (49 CFR 571)
 US: NHTSA FMVSS 217 (49 CFR 571)
 CANADA: CSA D250

Stock No.	Description	Size
V97011	Yellow School Bus Conspicuity	1" x 150'
V97012	Yellow School Bus Conspicuity	2" x 150'

Reflex Reflective Stick-On Reflectors

Our reflectors are designed with highly prismatic lenses secured to a durable transparent resin base. Produced on a clear poly liner, the rolls are easy to work with and the reflectors peel cleanly for application.

Each reflector is marked with the SAE A DOT certification. These reflectors are easy to install and are a cost effective alternative to plastic models. Meets or exceeds SAE J592 A.

Available in longer length rolls for OEM applications.

Stock No.	Description	Size
RR250AM	Amber Lens Reflectors (50 per roll)	2" x 3-1/2"
RR250RD	Red Lens Reflectors (50 per roll)	2" x 3-1/2"
RR350AM	Amber Lens Reflectors (50 per roll)	3" circle
RR350RD	Red Lens Reflectors (50 per roll)	3" circle

Highly Reflective

Hard Hat Decals

Improve the safety of your employees with our selection of high intensity reflective hard hat decals. The reflective and colorful properties of these adhesive markers will help get your employees noticed both day and night.

High Intensity product has a reflective value of over 8 times that of our standard engineer grade products. Product meets or exceeds ASTM D-4956 Type III.

Simply peel from liner and apply. Each decal kit contains the following: 16 pcs (4" x 1") per sheet Custom printing and shapes available to suit your specific applications.

Superbrite

Meets ASTM D-4956 Reflectivity Type III/IV

Stock No.	Description	Size
HHD920WH	White Reflective Decals	16 decals/sheet
HHD920RD	Red Reflective Decals	16 decals/sheet
HHD920YL	Yellow Reflective Decals	16 decals/sheet
HHD920GR	Green Reflective Decals	16 decals/sheet
HHD920BL	Blue Reflective Decals	16 decals/sheet

Reflective Kit

Hard Hat Decals

Improve the safety of your employees with our selection of shaped reflective hard hat decals. The reflective and colorful properties of these adhesive markers will help get your employees noticed both day and night.

The material is an ASTM D-4956-99 Type I reflective sheeting with a permanent adhesive. Simply peel from liner and apply.

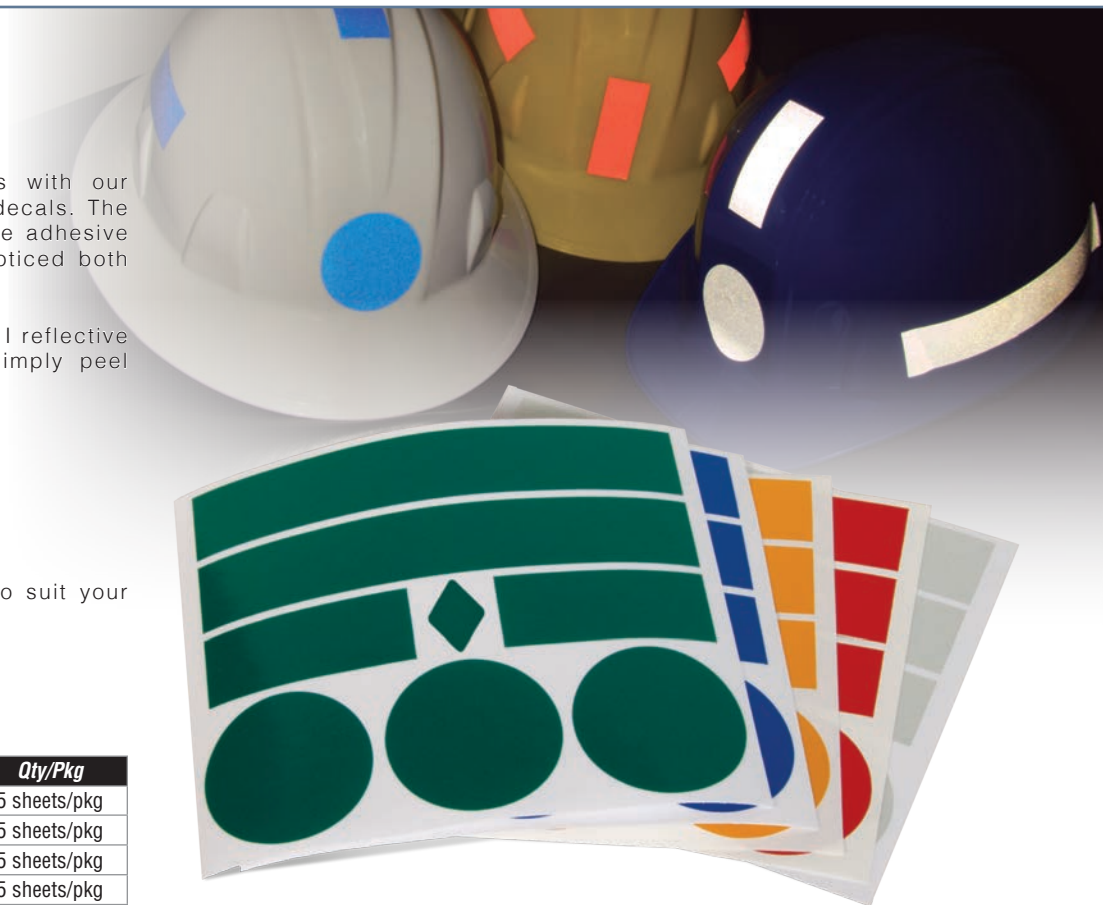

Each decal kit contains the following:

- 2 pcs (6" x 1")
- 2 pcs (2.5" x 1")
- 1 pcs (0.75" x 1" diamond)
- 3 pcs (2" diam circles)

Custom printing and designs available to suit your specific applications.

Stock No.	Description	Qty/Pkg
HHD900WH	White Reflective Assorted Decals	5 sheets/pkg
HHD900RD	Red Reflective Assorted Decals	5 sheets/pkg
HHD900YL	Yellow Reflective Assorted Decals	5 sheets/pkg
HHD900GR	Green Reflective Assorted Decals	5 sheets/pkg
HHD900BL	Blue Reflective Assorted Decals	5 sheets/pkg
HHD900OR	Orange Reflective Assorted Decals	5 sheets/pkg

What are pipe markers?

Identify pipe contents and potential hazards

Pipe markers are an important part of safety markings in your facility. These markers help emergency responders and your staff quickly identify pipe contents and potential hazards.

Common uses for pipe & valve identification

- Mechanical Contractors
- HVAC
- Refineries
- Hospitals
- Municipal buildings
- Manufacturing facilities

ASME A13.1-2015 Designation of Marker Colors

FIRE QUENCHING FLUIDS	SAFETY RED WITH WHITE TEXT
TOXIC AND CORROSIVE FLUIDS	SAFETY ORANGE WITH BLACK TEXT
FLAMMABLE AND OXIDIZING FLUIDS	SAFETY YELLOW WITH BLACK TEXT
COMBUSTIBLE FLUIDS	SAFETY BROWN WITH WHITE TEXT
POTABLE, COOLING, BOILER FEED AND OTHER WATER	SAFETY GREEN WITH WHITE TEXT
COMPRESSED AIR	SAFETY BLUE WITH WHITE TEXT
TO BE DEFINED BY USER	SAFETY PURPLE WITH WHITE TEXT
TO BE DEFINED BY USER	SAFETY WHITE WITH BLACK TEXT
TO BE DEFINED BY USER	SAFETY GRAY WITH WHITE TEXT
TO BE DEFINED BY USER	SAFETY BLACK WITH WHITE TEXT

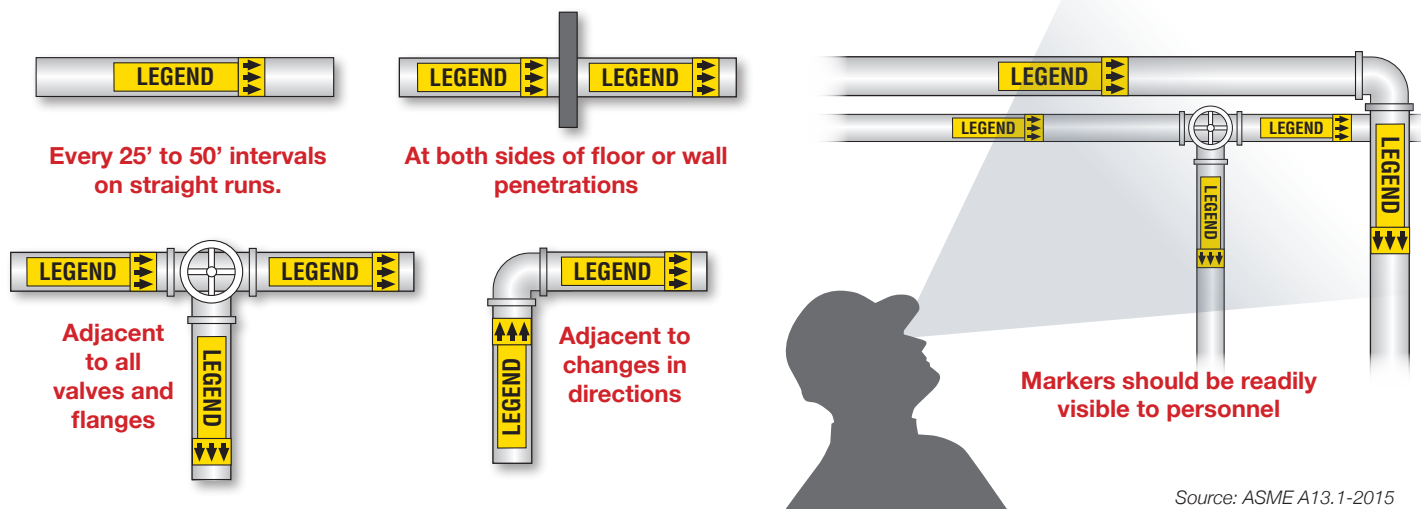

ASME A13.1-2015 Letter Height & Length of Marker

A	B	C
Pipe Outer Diameter	Letter Height	Length of Marker
3/4" thru 1-1/4"	1/2"	8"
1/2" thru 2"	3/4"	8"
2-1/2" thru 6"	1-1/4"	12"
8" thru 10"	2-1/2"	24"
Over 10"	3-1/2"	32"

ASME A13.1-2015 Location of Identification Markers

ASME A13.1-2015 (Section 3.1) Arrows shall be used to indicate direction of flow.

Source: ASME A13.1-2015

Adhesive Pipe Markers

Our adhesive VynMark pipe markers have a permanent adhesive backing and thick clear UV, abrasion and fade resistant coating. Markers will adhere to a wide variety of smooth clean surfaces. Must be used in conjunction with a flow direction indicator for compliance. We recommend the use of our directional flow arrow tape on page 46.

All colors meet the ANSI 535.1 and Z535.1 Safety Color Chart. Markers comply with ANSI/ASME A13.1-2015.

HOW TO ORDER MARKERS:	SELECT MARKER - PM1000	SELECT TYPE/SIZE - VA	ADD TOGETHER - PM1000VA	
Size code	Marker Size	Character Height	Diameter of Pipe	Material
VA	1" x 8"	1/2"	3/4" thru 1-1/4"	Adhesive VynMark
VB	1-1/4" x 8"	3/4"	1-1/2" thru 2"	Adhesive VynMark
VC	2" x 12"	1-1/4"	2-1/2" thru 6"	Adhesive VynMark
VD	3" x 24"	2-1/2"	8" thru 10"	Adhesive VynMark
VE	4" x 32"	3-1/2"	Over 10"	Adhesive VynMark

Snap On Style Pipe Markers

Manufactured using a rigid base stock with a UV, fade and abrasion resistant coated print.

Our coil wrap pipe markers offer an excellent way to quickly and easily mark your pipes. Simply uncoil the marker, apply to pipe and it will coil back around without having to clean or prep the pipe surface. These markers offer 360 degree viewing and have directional flow arrows included in the printing to speed installation times.

For pipe sizes up to 6" use our coiled snap on style. For pipe sizes over 6" use the strap on style that includes nylon cable ties. Snap on pipe markers in sizes 2-1/2" to 6" include an adhesive stripe for added durability applications over 120F.

Printed plastic sheet can be installed with supplied zip ties

Directional Flow Arrow Tape

Use our directional flow arrow tape to easily and effectively mark pipe flow direction. Our arrow tape is made from a durable base stock with an aggressive adhesive and clear over-lamination to protect the printed surface and offer years of service. All our banding tape has a continuous print design with no white line every foot, which allows for a professional looking installation.

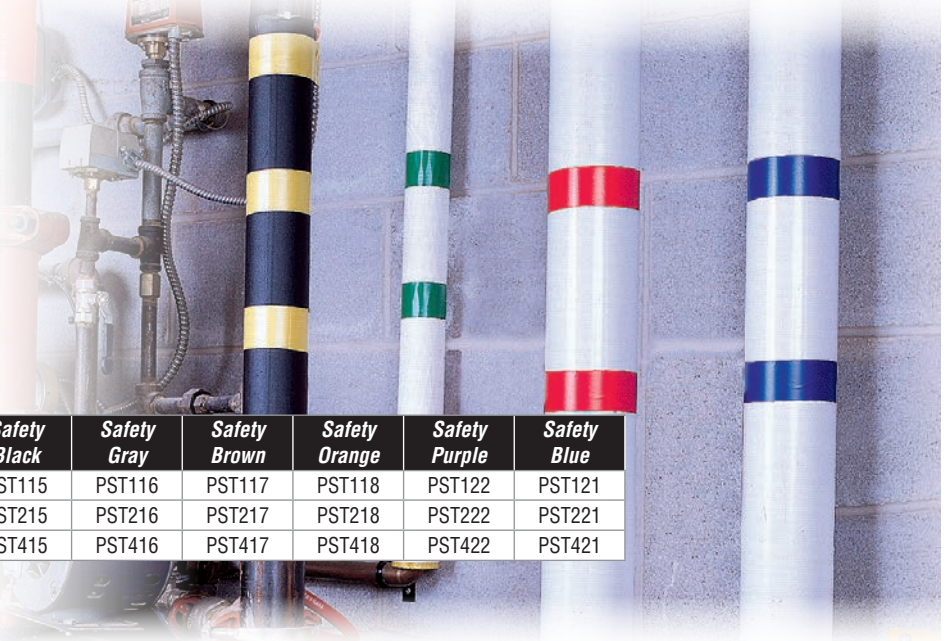

All colors meet the ANSI 535.1 and Z535.1 Safety Color Chart. They also comply with ANSI / ASME A13.1 standard for pipe markings including the new colors introduced under ANSI/ ASME A13.1-2015.

Pipe Banding Conformable Tape

We offer a wide selection of quality pipe banding tapes. Our pipe banding tapes are made from a durable film with a rubber adhesive system that will adhere to most any clean, dry surface. The construction offers a smooth, conformable matte finish that is great for pipe banding applications. All tapes are made in a wide array of OSHA colors that meet ANSI Z535.1 and offer excellent durability and chemical resistance.

Pipe Markers On-A-Roll

Pipe markers are an important part of safety markings in your facility. These markers easily help emergency responders and your staff quickly identify hazards and pipe contents.

Our pipe markers are made from durable adhesive backed stock with a protective overlamination. These markers are perforated every 9 inches between each legend for easy use as singles, or allowing larger strips for longer applications. Once applied to a clean, dry surface, these markers will offer a long term marking solution for your facility. Customization available.

All colors meet the ANSI 535.1 and Z535.1 Safety Color Chart. They also comply with ANSI / ASME A13.1 standard for pipe markings including the new colors introduced under ANSI/ASME A13.1-2015.

Available in 1" x 54' and 2" x 54' rolls.

F	2" x 3"	2" x 54'	2-1/2" thru 4"	216	

Stencil Pipe Marker

Looking for a more durable Pipe Marking solution? Our Pipe Marker Stencils provide a permanent painted solution to identify your pipes. These durable and reusable stencils are easy to use and provide professional looking markings. Stencils are made with 0.020" HDPE and available in 2 stock sizes.

Custom stencils available. Call for details.

9" x 27"

For 4-1/2" to 6-1/2" diameter pipes.
1-1/4" Height letters.

11" x 45"

For 8" to 10" diameter pipes.
2-1/2" Height letters.

Custom Engraved Plastic Valve Tags

Engraved 0.125" plastic tags offer a very durable way to mark valves and pipes. Our tags are made from a durable multi-layered plastic custom engraved with your wording or design for maximum longevity. Variable text and numbering is available on all tags. Standard colors shown below, with custom color and size options available on request.

Colors

BLACK ON YELLOW

WHITE ON RED

WHITE ON GREEN

Available in circle and square shapes 1-1/2", 2", 3" and 4"

Brass Number Tags

Consecutive numbered brass tags are a staple of the pipe and valve identification process. These 0.032" thick, tumbled, brass tags have consecutive numbers (3/8" height), stamped into the brass, then black filled for maximum durability and visibility. Available in a complete range of numbers in sets of 25. Tags are 1-1/4" diameter with 3/16" hang holes.

Stock No.	Description	Qty/Pack

WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov.

Aluminum Property Tags

Use our serially numbered property control tags for a positive identification of company assets, valves and process equipment. Made from a durable 0.040" thick aluminum with lettering and numbering stamped into the aluminum and black filled for maximum visibility. Consecutive numbering available. Tags available in two sizes with 1/8" mounting holes.

3" x 1.25"

1.9375" x 1.1875"

Valve Tag Accessories

We offer a selection of tag hanging accessories to aid in your identification project. All products are 100/pkg.

Abatement

Temporary Hazard Signs

Help maintain a safe and compliant job site during abatement projects. These thick paper signs offer a visual warning of hazards to workers and other on-site personal. All abatement signs come in 11" x 17" size and are intended for indoor or short-term outdoor applications.

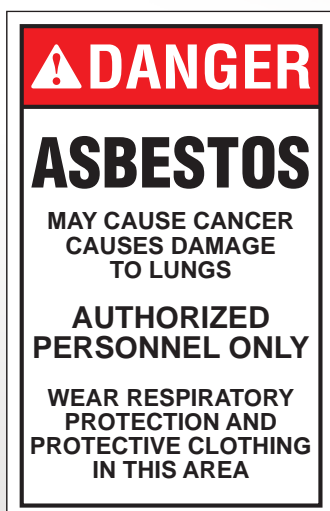

We have a wide range of chemical hazard warnings including asbestos, lead, silica and microbial. Custom wording, logos and graphics available, contact us for details.

Check with local, provincial/state and federal authorities to ensure use of proper warning identification to maintain compliance.

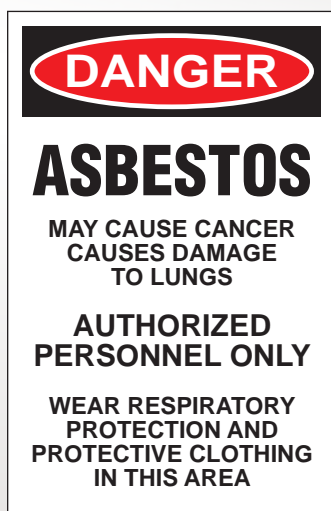

Packaged 100 signs per pack.

Abatement Tags

Aids in keeping workers safe and informed, our abatement tags offer a visual explanation of the safety hazard in bold clear text. A clear way to help promote the safe handling, storage and disposal of contaminants.

Tags are packaged 25/pkg with a standard back print on all designs. Custom wording, graphics and logos available.

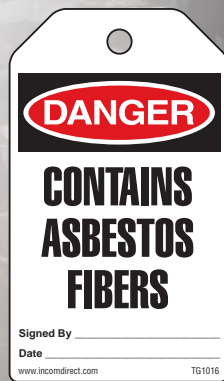

Tags are available in 3.375" x 5.75" with 3/8" holes.

Abatement Barricade Tape

We offer a wide selection of barricade tape legends and colors to aid in your abatement projects. These durable barricade tapes are all made from a thick polyethylene material and packaged 3" x 1000' per roll. We have a wide range of chemical hazard warnings including asbestos, lead, silica and microbial.

For our full line of barricade tape products, see pages 32-33. Custom wording, logos and graphics available, contact us for details.

Abatement

Polyethylene Tape

Our PTAK 33-series Poly Tape is designed specifically for the Abatement industry. The thick polyethylene offers a durable working surface while the rubber adhesive will bond well to most surfaces, even in lower temperatures. Ideal for use with poly sheeting in abatement applications.

Tape will also remove cleanly from most surfaces in temporary application. Tape comes with a serrated "pinked" edge for easy tearing, even with gloves on.

Stock No.	Description	Size
PTK33R48SE	Red Tape	2" x 180'
PTK33R72SE	Red Tape	3" x 180'

Heavy Duty

Polyethylene Tape

Our PTAK 36-series Poly Tape is our most durable and versatile polyethylene tape product. The heavy coat weight of adhesive allows for a high adhesion to surfaces. This tape is effective for general patching as well as heat shrink applications, and is used in truck manufacturing for isolating dissimilar metals.

Adhesive is very strong and designed for permanent applications and will leave heavy residue if removed.

Stock No.	Description	Size
PTK36C48	Clear Tape	2" x 180'
PTK36C72	Clear Tape	3" x 180'
PTK36C96	Clear Tape	4" x 180'

What are safety signs?

Effectively communicate important safety messages to employees and visitors

Hazard and safety communications are prevalent in the workplace. Safety signs help identify hazards by their use of the signal words DANGER, WARNING, CAUTION, or NOTICE. ANSI-style signs most often include specific details about the nature of the hazard, the consequence of interaction with the hazard, and avoidance procedures. Product manufacturers and facility owners in a wide array of industries use the ANSI Z535 standards in their efforts to assure a safer workplace.

The ANSI Z535 standards are often cited in as the state-of-the-art benchmark against which safety markings and their adequacy are judged.

Common uses for safety sign

- Hazard awareness
- Emergency exit points
- Chemical or gas hazards
- Physical hazards
- Safety equipment awareness
- Facility notice signs
- Personal Protective Equipment - PPE
- Traffic control
- Low light requirements
- Indoor and long term outdoor options available

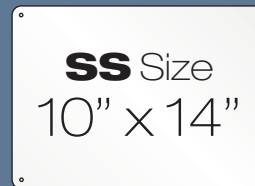

Material Options

Effectively communicate important safety messages to employees and visitors with our full line of safety signs. Choose from our variety of materials for the best fit for your particular application.

Material	Thickness	Flexibility	Mounting Type	Product Use	UV Resistance
V - Adhesive VynMark with SignArmor	0.004"	Flexible	Adhesive Backed	Indoor or short term use outdoor	1 to 3 years outdoors
VL - Adhesive VynMark with UV Lamination	0.007"	Flexible	Adhesive Backed	Long term outdoor	5 to 7 years outdoors
P - Semi-Rigid Plastic with SignArmor	0.055"	Semi-Rigid	Corner Holes	Indoor or short term use outdoor	1 to 3 years outdoors
PL - Semi Rigid Plastic with UV Lamination	0.058"	Semi-Rigid	Corner Holes	Long term outdoor	5 to 7 years outdoors
A - Aluminum with SignArmor	0.040"	Rigid	Corner Holes	Indoor or short term use outdoor	1 to 3 years
AL - Aluminum with UV Lamination	0.043"	Rigid	Corner Holes	Long term outdoor	7 to 10 years
MV - Magnetic Sheeting with SignArmor	0.035"	Semi-Rigid	Magnetic	Indoor or outdoor	1 to 3 years
*VG - Glow-in-the-dark Adhesive VynMark with SignArmor	0.009"	Flexible	Adhesive Backed	Indoor	N/A
*PG - Glow-in-the-dark Semi-Rigid Plastic with SignArmor	0.045"	Semi-Rigid	Corner Holes	Indoor	N/A

*Glow-in-the-dark meets or exceeds standards: DIN 67510, ASTM E2072-14, ISO 15370, EU Marine Equipment Directive, IMO Resolution A. 752 (18) and PSPA class B

Our full line of stock safety signs are available in:

Chemical, UV, graffiti and scratch resistant

All our safety sign products come with SignArmor at no additional charge.

This coating offers many benefits to a printed sign surface including chemical, weather and graffiti resistance. The special formulation of this product improves the UV resistance of the printed sign surface which adds significantly to the overall performance of the sign. The SignArmor coating creates a difficult surface for paints, markers and chemicals to attack and allows for easy removal of graffiti using standard paint removal products while not damaging the printed sign surface.

Ensure that your sign products have the SignArmor coating for added performance.

DANGER Safety Signs

Indicate immediate danger and that special precautions are necessary. OSHA specifies that red, black and white colors are to be used for danger signs.

It is the sole responsibility of the user to determine the suitability of this product for their application, including, but not limited to, identifying the risk and its classification. When in doubt consult a qualified professional.

Choose from our variety of materials for the best fit for your particular application. Don't see the legend you need? Give us a call to see what we can do for your next sign requirement.

CAUTION Safety Signs

Warn against potential hazards or caution against unsafe practices. OSHA specifies that caution signs must have a yellow background and black panel with yellow letters. All letters used against the yellow background must be black.

It is the sole responsibility of the user to determine the suitability of this product for their application, including, but not limited to, identifying the risk and its classification. When in doubt consult a qualified professional.

Choose from our variety of materials for the best fit for your particular application. Don't see the legend you need? Give us a call to see what we can do for your next sign requirement.

Call for details

Unable to find the sign you need to communicate your message in our wide variety of off-the-shelf signs? Give us a call to see what we can do for your next sign requirement.

SAFETY & HOUSE KEEPING Signs

Must be used where there is a need for general instructions and suggestions relative to safety measures. OSHA specifies that safety instruction signs must have a white background, green panel and white letters. Any letters used on the white background must be black.

It is the sole responsibility of the user to determine the suitability of this product for their application, including, but not limited to, identifying the risk and its classification. When in doubt consult a qualified professional.

Choose from our variety of materials for the best fit for your particular application. Don't see the legend you need? Give us a call to see what we can do for your next sign requirement.

ANSI Safety Signs

ANSI format signs offer a great way to communicate critical health and safety information in your workplace. These signs display hazards and safety information in a consistent manner for effective communication. ANSI signs include information in both text and a visual pictogram to reinforce the message.

Choose from our variety of materials for the best fit for your particular application. Don't see the legend you need? Give us a call to see what we can do for your next sign requirement.

Mandatory Take action to avoid the hazard

Prohibited Forbid an action to avoid the hazard

Warning Identify the hazard to avoid

Facility & Parking Signs

Make customers and visitors aware of driving and parking restrictions with our full line of parking signs. Mark parking lots, lane ways and other areas clearly and professionally with our wide variety of legends.

All signs are 12" x 18" and made from 0.050" Aluminum with 4 mil UV protective lamination. They come with 2 pre-drilled holes centered top and bottom for an easy install on posts or walls. Consult local regulations regarding specific guidelines.

Choose from standard Aluminum or Reflective Aluminum for the best fit for your particular application. Don't see the legend you need? Give us a call to see what we can do for your next sign requirement.

Fire Safety Bulk Signs

Looking for a cost effective way to mark fire safety features and equipment? Our bulk fire safety signs are made from a 10 point semi-rigid plastic or adhesive VynMark with a protective over-lamination to offer years of indoor service. These signs can be easily mounted to most any surface. Check with Federal, state and local guidelines on the use of EXIT signage in your region.

All signs are 10" x 14". Packaged in 50 signs per package for best value. Custom colors and legends available on orders of 250+ signs.

Floor Signs Anti-Slip

These high visibility graphic floor signs provide a constant reminder to your employees about important Workplace Hazard, Safety Requirement and General Notice information details. Constructed from a high quality adhesive VynMark stock, we laminate a thick textured material to these signs for added durability as well as slip resistance. The sub-surface printed images provide extended durability and will stand up to heavy pedestrian traffic. The aggressive adhesive will adhere to most smooth, clean and dry floors. These signs have a maximum diameter or length of 17".

ANTI-SLIP SURFACE

Glow-in-the-dark Floor Signs Anti-Slip

Enhance your emergency exit routing with our photoluminescent floor signs. These signs have a textured surface for slip resistance and our Glow-in-the-dark material for visibility in low light conditions.

The clear graphics are easily understood and are highly visible. Our luminous signs will maintain visibility to the light adjusted eye for up to 6 hours. These signs have a maximum diameter or length of 17".

MEETS OR EXCEEDS STANDARDS:

- DIN 67510
- ASTM E2072-14
- ISO 15370
- EU Marine Equipment Directive
- IMO Resolution A. 752 (18)
- PSPA class B

Door Swing Floor Sign Anti-Slip

Helps eliminate an often overlooked safety hazard. This "Door Swing" graphic will clearly remind people of the swing area and prevent the potential of injury from opening doors. This floor graphic is based on a 34" swing radius area.

Custom sizes/text also available. Contact customer service for details.

ArmorStripe

Ultra Durable Floor Signs

ArmorStripe offers an extremely durable system to aid in floor safety signage. These products are made from an ultra durable plastic without the use of print. This special process ensure that the image will remain legible through the entire life of the floor signing system.

These floor signs are made from a through-color solid 0.055" thick rigid polyethylene surface with an ultra tacky heavy coat weight adhesive backing. They will adhere to most any clean smooth surface with a very high tack bond while offering a low residue removal from most applications. Complies with ANSI B101.1 SCOF (Dry) and ANSI A137.1 (Dry) for use in dry floor applications.

Available in an assortment of stock sizes and colors with custom options available.

A-Frame

Standing Floor Signs

The A-Frame standing floor sign is the best way to give a clear warning of a temporary hazard or communicate a message to pedestrian traffic. Printed both sides so the message is clearly visible from both directions and made from durable lightweight plastic. These signs are easily portable and can be positioned on any flat surface when needed. The A-Frame design provides a sturdy platform that is difficult to knock over. This design also allows the user to collapse the sign and lay flat for easy storage when not in use.

Don't see the message you need? Contact us with the details and we will print the wording you require.

What are safety tags?

Used to effectively communicate important safety messages to employees and visitors

Hazard and safety communications are essential in the workplace. Safety Tags help Identify hazards by the signal words DANGER, WARNING, CAUTION, or NOTICE. ANSI-style tags most often include specific details about the nature of the hazard, the consequence of interaction with the hazard, and avoidance procedures. Product manufacturers and facility owners in a wide array of industries use the ANSI Z535 standards in their efforts to assure a safer workplace.

The ANSI Z535 standards are often cited as the state-of-the-art benchmark against which safety markings and their adequacy are judged.

Common uses for safety tags

- Lock Out/Tag Out
- Hazard Control
- Electric shock hazards
- Machine repair
- Physical hazards
- Chemical or biological hazards
- Construction sites
- Manufacturing
- Fire Suppression Equipment

HOW TO CHOOSE Safety Tags

PT Grade

This is our most economical option in safety tags. Made from a 10-mil (0.010") stock that is a good choice for indoor or limited use outdoor applications. Stock is waterproof and can be written on with pencil, ball point pen or marker. Available in packages of 25, or by the roll for best value.

RP Grade

Our RP series safety tags are an upgrade on the PT material. Made with a thicker waterproof 15-mil (0.015") material which can be written on with pencil, ball point pen or marker. This grade also has a metal grommet for added hole strength.

RL Grade

The RL grade is our toughest and most durable option at 20-mil (0.020"). Our DuraPly stock is covered with a thick over laminated and affixed with a heavy duty 3/8" diameter metal grommet for extra strength. Tags are suited for both indoor and outdoor applications, and may be written on with marker or pen. This option will also meet a 50-lb pull test for lockout/tagout applications.

Custom Options

Unable to find the tag you need to communicate your message in our wide variety of off-the-shelf tags? Let us help you design the exact tag you will need for your application. Our tag production capabilities offer a wide range of design, print and finishing options. With our state-of-the-art digital printing we are able to produce cost effective, rapid delivery tags to meet the needs of any application.

Give us a call to see what we can do for your next tag requirement.

DANGER OSHA Workplace Tags

It is the sole responsibility of the user to determine the suitability of this product for their application, including, but not limited to, identifying the risk and its classification. When in doubt consult a qualified professional.

We offer 3 different material types to meet all budgets and durability issues. All tags are printed on both sides with state of the art digital printing and come 25 per pack. Don't see the legend you need? Give us a call to see what we can do for your next tag requirement.

Self Laminating Tags Durability & Convenience

Our stock self laminating tags offer an easy way to protect the information on your tags. Designed with a thick 2 mil clear protective laminating flap, these tags are a highly durable option for use in your facility. Simply write in the required information, peel off the backing from the lamination flap and seal the tag. Once sealed, the information on your tag will be protected from dirt abrasion or chemical splashes. Also a great way to prevent further changes to the tag once it is put into use.

Tags are made from a durable 15 mil stock and measure 3-3/8" x 5-3/4". Sold in packages of 24 with 3/8" eyelet.

1 Identify the hazard and write your message.

2 Peel back the liner while applying the lamination.

3 Communicate the hazard quickly and effectively with no smudging or wearing on text.

Lightning Bolt is a Registered Design of INCOM Manufacturing Group

Tags-On-A-Roll

With Convenient Dispenser Box

Safety tags supplied in a roll provide an easy and convenient way to transport and contain your tags, providing a larger tag quantity on hand for heavy demand applications.

Made from 10-mil Polytag stock, these tags are a good choice for indoor or limited use outdoor applications. Stock is waterproof and can be written on with pencil, ball point pen or marker. These tags are 3" x 6.25" with a 0.375" hole and come with 100 or 250 tags per box. These tags are like traditional tags, but connected together by an easy to tear perforation. Just pull the next tag from the dispenser box and tear it off.

The specially designed dispenser box keep the tags safely and neatly contained for any on the go application Perfect for work vehicles, tool cribs, mobile work carts, and many other applications.

Available in a large selection of stock legends, as well a thermal printable versions for a print on demand application. Custom versions also available. Please contact us for details.

Let us help you design the exact tag you will need for your application. Our tag production capabilities offer a wide range of design, print and finishing options.

What is DOT?

Department of Transportation

Department of Transportation (DOT) is focused on the prevention of incidents when dangerous goods are imported, handled, or offered for transport.

Placards are displayed on vehicles and tanks to identify the risk of products being transported. Shipping labels are essential for packages that contain dangerous goods. All product manufactured to Department of Transportation specifications.

Dangerous Goods Placards

Dangerous goods truck placards are displayed on vehicles and tanks to identify the risk of products being transported. We manufacture our entire placard line to meet Department of Transport (DOT) guidelines and offer them in several material options. Our coated paper tagboard placards offer a cost effective single use; rigid plastic placards offer multiple use even under severe weather conditions; and our adhesive backed VynMark placards are perfect for permanent marking.

**HANDLE

Transport Vehicle Markings

We manufacture a wide selection of safety signs & decals, reflectors, and Conspicuity tapes for a variety of fleet marking applications.

Truck Flip Placards and Placard Holders

Our placard holders are manufactured out of high quality aluminum or stainless steel with a stainless steel clip to ensure longevity even in the worst conditions. Our flip charts are printed with DOT legends, and the design is built for durability with a heavy .032" aluminum back plate with baked-on polyester finish to resist fading.

DOT Worded Truck Placards (USA Version)

DOT Truck placards are displayed on vehicles and tanks to identify the risk of products being transported. We manufacture our entire placard line to meet Department of Transport (DOT) guidelines and offer them in several material options. Our paper tagboard placards offer a cost effective single use; rigid plastic placards offer multiple use even under severe weather conditions; and our adhesive backed VynMark placards are perfect for permanent marking. All placards are 10-3/4" x 10-3/4".

Other DOT legends and custom UN numbered placards also available, please call for details. For Canadian TDG version placards please refer to page 128-129.

Adhesive VynMark
 Intended for permanent application on the transport vehicle. They are constructed with an outdoor grade 4-MIL VynMark with an aggressive permanent adhesive backing. Once applied these placards provide a permanent DOT marking solution. 100/pack

Rigid Plastic
 Printed on durable plastic using weather and UV resistant inks. Able to withstand repeated usage under most conditions. Intended for use with placard holders. 100/pack

Tagboard
 Made from a semi-rigid paper card stock with a water resistant coating on both sides. This material is intended for single trip usage, at an economical price. Intended for use with placard holders. 100/pack

What is TDG?

Transportation of Dangerous Goods

Transportation of Dangerous Goods (TDG) is focused on the prevention of incidents when dangerous goods are imported, handled, or offered for transport.

Placards are displayed on vehicles and tanks to identify the risk of products being transported. Shipping labels are essential for packages that contain dangerous goods. All product manufactured to Transport Canada specifications.

Dangerous Goods Placards

Placards are displayed on vehicles and tanks to identify the risk of products being transported. We manufacture our entire placard line to meet Transport Canada guidelines and offer them in your choice of material. Our coated paper tagboard placards offer a cost effective single use; rigid plastic placards offer multiple use even under severe weather conditions; and our adhesive VynMark is perfect for permanent marking.

**HANDLE
WITH CARE**

Transport Vehicle Markings

We manufacture a wide selection of safety signs & decals, reflectors, and Conspicuity tapes for a variety of fleet marking applications.

Truck Flip Placards and Placard Holders

Our placard holders are manufactured out of high quality aluminum or stainless steel with a stainless steel clip to ensure longevity even in the worst conditions. Our flip charts are printed with Canadian TDG legends, and the design is built for durability with a heavy .031" aluminum back plate with baked-on polyester finish to resist fading.

TDG Truck Placards (Canada & International)

Placards are displayed on vehicles and tanks to identify the risk of products being transported. We manufacture our entire placard line to meet Transport Canada guidelines and offer them in your choice of material. Check with local compliance authorities to determine correct product for your application. All placards are 10-3/4" x 10-3/4".

Adhesive VynMark

Intended for permanent application on the transport vehicle. They are constructed with an outdoor grade 4-MIL VynMark with an aggressive permanent adhesive backing. Once applied these placards provide a permanent TDG marking solution. 100/pack

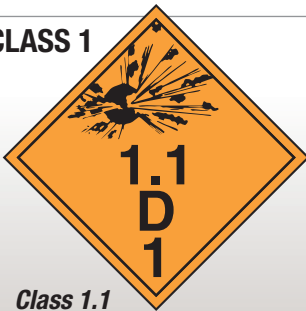

Rigid Plastic

Manufactured on durable plastic able to withstand repeated usage under any weather conditions. The ink is applied using a silk screen process to ensure print quality and resist fading. Intended for use with placard holders. 100/pack

Tagboard

Made from a semi-rigid paper card stock with a water resistant coating on both sides. This material is intended for single trip usage, at an economical price. Intended for use with placard holders. 100/pack

Placard Holder

Our placard holders are manufactured out of high quality aluminum or stainless steel with a stainless steel clip to ensure longevity even in the worst conditions. Placard holders have 10 pre-drilled mounting holes for ease of installation. Holder has a formed ramp at the clip to guide placards easily over the clip during removal. Back plate has several raised bumps that keep plastic placards from becoming stuck in the holder during winter weather.

Placard holder is available in natural aluminum (PH223) Or for ultimate durability, longevity and chemical resistance, try our stainless steel version (PH226).

PH223W
(Painted White)

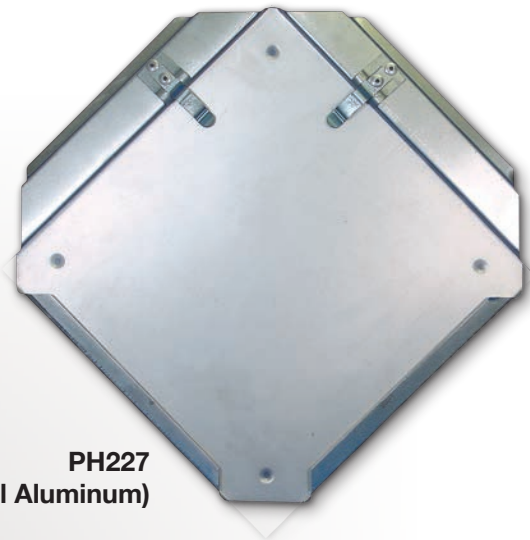

PH223
(Natural Aluminum)

PH226
(Stainless Steel)

Easy Access Aluminum Placard Holder With Shield

These highly durable placard holders are ideal for extreme weather or muddy conditions because they come with a removable protective shield to cover the placard while in use. This style of placard holder is typically considered the easiest to use in severe conditions.

Replacement shields (PH221) and clips (FCCLIP) also available.

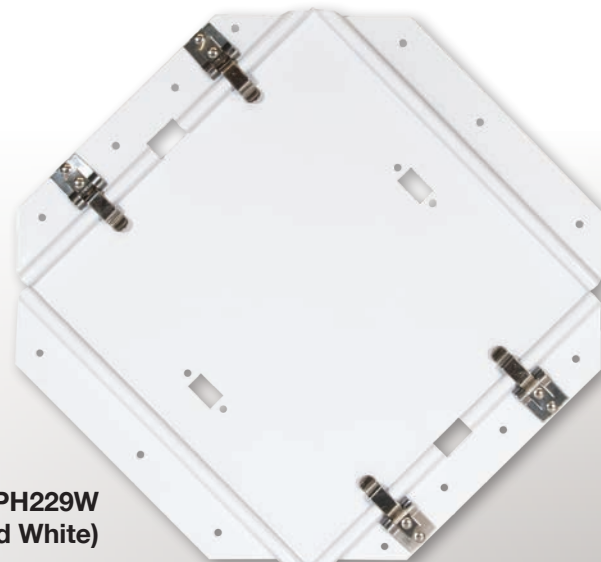

PH227
(Natural Aluminum)

Heavy Duty Placard Holder

Our Heavy Duty Placard holders are manufactured out of 0.040" thick pre-painted white aluminum with a stainless steel clip to ensure longevity even in the worst conditions. These holders have 14 pre-drilled mounting holes for installation. The Heavy Duty holder has a four clip design for added grip on your TDG placards. When used in combination with our PH221 clear shield, it will provide a highly durable, and easy to use placard holding system.

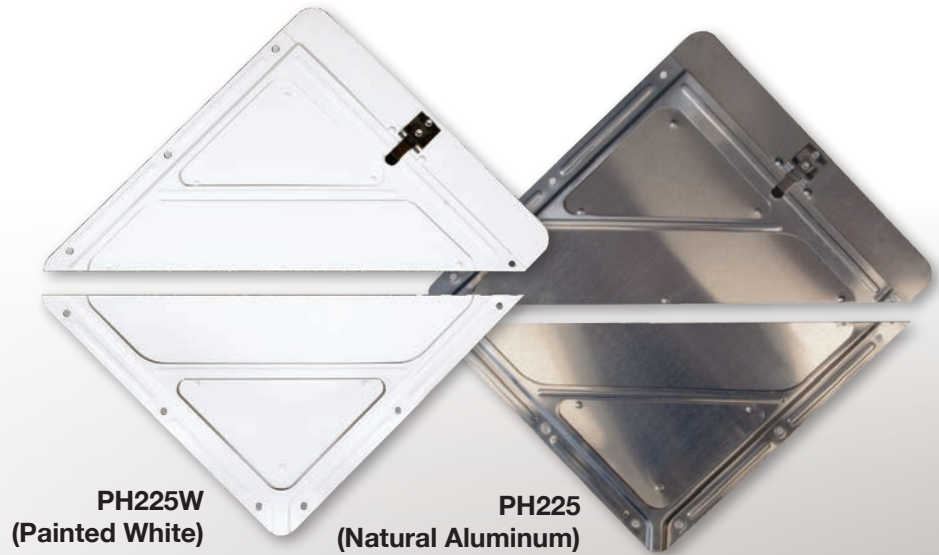

Sized at 14.5" x 14.5", this holder can also be used on most roll up style doors.

PH229W
(Painted White)

Split Placard Holder

Our Split Placard Holders use our standard model (PH223/PH223W) and are split down the middle of the holder allowing for roll up door applications. Manufactured out of high quality aluminum and a stainless steel clip to ensure longevity even in the worst conditions. Placard holders have 10 pre-drilled mounting holes for ease of installation. Holder has a formed ramp at the clip to guide placards easily over the clip during removal. Back plate has several raised bumps that keep plastic placards from becoming stuck in the holder during winter weather.

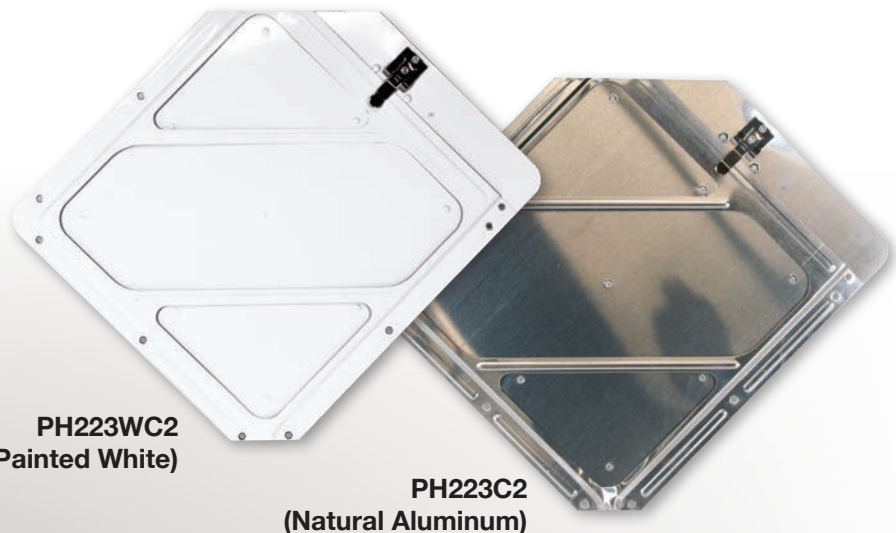

PH225W
(Painted White)

PH225
(Natural Aluminum)

Clipped Corner Placard Holder

These placard holders are the same design as our PH223 series, but have the corners "clipped" for use on roll up doors. Measuring 14.875" across from clipped corner to clipped corner. Manufactured out of high quality aluminum with a stainless steel clip to ensure longevity even in the worst conditions, these placard holders have 10 pre-drilled mounting holes for ease of installation. Holder has a formed ramp at the clip to guide placards easily over the clip during removal. Back plate has several raised bumps that keep plastic placards from becoming stuck in the holder during winter weather.

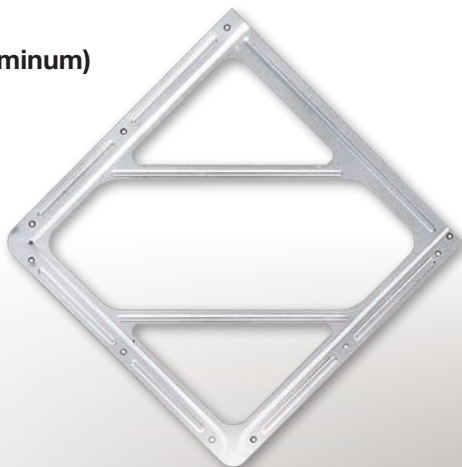

PH223WC2
(Painted White)

PH223C2
(Natural Aluminum)

Placard Holder Face Plates

For an economical solution, try the face plate only version of our holders. Simply mount them directly on the trailer, add a stainless steel clip (PHCLIP) in the appropriate space, and save. This face plate holder is available in natural aluminum (PH230).

PH230
(Natural Aluminum)

Protective Shield

Our clear placard shields are made from durable 0.040" clear polyethylene PETG plastic. These shields will protect the surface of the placard from abrasion, and will ensure tagboard style placards cannot blow out in wet weather. Plastic offers excellent impact resistance. Compatible with PH223 and PH227 holders

PH221
(Clear shield only)

DOT Worded Truck Flip Placards (USA Version)

Our exclusive design is built for durability. Heavy duty aluminum back plate with baked-on polyester finish to resist fading. The legends are screen printed on corrosion resistant aluminum panels. Stainless steel spring clips are mounted to hold the pages in place and all corners are rounded for easy handling. The aluminum base is available in white enamel finish or mill finish.

Rigid-Flip Rectangle Page Flip Placard

The FC9000 series "Rigid-Flip" placards are a versatile flip placard with features that differ from our standard model. The construction of the pages has an added benefit utilizing a cutout in the page so each clip arm seats securely in place to help reduce both page wear and clip loss during use. Page turning is made easy by two finger cutouts adjacent to each other on the frame. This allows the user access to the edge of the pages and select the desired legend. All weather versatility with large ridges that run along all 4 sides of the thick durable base for added strength. Rectangular shape of pages, coupled with the location of hinges and stainless steel clips being closer to corners and edge helps to reduce curled page edges for added safety. Made from a ultra durable 0.04" thick aluminum.

Rigid-Flip placard systems are 15" between clipped corners for use on most roll up style doors. Contact us for the full range of standard and custom options for this new flip placard product.

ISO 17712:2013

C O M P L I A N T

High Security Bolt Seal

APPLICATION

- Trailer Doors Latches
- Container Door Latches

FEATURES

- Meets ISO 17712:2013 compliant (C-TPAT)
- Both parts can be numbered to prevent fraud by replacement of either Bolt or Body
- Parts come attached in a unique package for ease of use and accurate tracking of numbers
- Anti-spin feature ensures the seal is locked when closed
- Removal requires bolt cutters
- Total length 3-3/4" with a 2-1/4" barrel for locking

High security, metal, temper evident, flexible cable seal. Lock body available in two colors. Cable is 3.5mm thickness.

APPLICATION

- Trucks/Trailers
- Meter Boxes
- Tote Boxes
- Rail Cars
- Containers
- Valves

FEATURES

- Meets ISO 17712:2013 compliant (C-TPAT)
- Die cast aluminum lock body can be in various colors
- Laser marking of numbers as well as barcodes
- Remove with cable cutter
- Standard length is 12 inches. Cable lengths can be varied according to requirements

Pull-Tight Seal

Adjustable strap seal with dual locking mechanism

APPLICATION

- Trucks/Trailers
- Refineries
- Postal bags
- Cash bags
- Warehouse
- Fuel oil tankers

FEATURES

- Dual Locking mechanism
- Beaded strap provide addition grip with applied surface
- Carefully designed strap diameter that enable sealing apertures
- Laser printing provides highest level of security
- Suitable for temperatures ranging from -20° C to 80° C
- Overall length 14 inches

Dual-Lock Seal

Dual-Lock Seal is a fixed length seal made from polypropylene plastic. It has an acetal jaw and unique double locking mechanism specially designed to enhance its security against tampering.

APPLICATION

- Vehicle doors
- Tankers - petroleum, bulk foods & liquids
- Shipping containers

FEATURES

- Fixed loop design, with an 8 inch overall length
- Patented double locking mechanism & ribbed locking head
- Acetal locking jaw with a higher melting point than polypropylene
- Pre-determined break point on the seal

California Regulatory Warning
WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

Easy-Break Seal

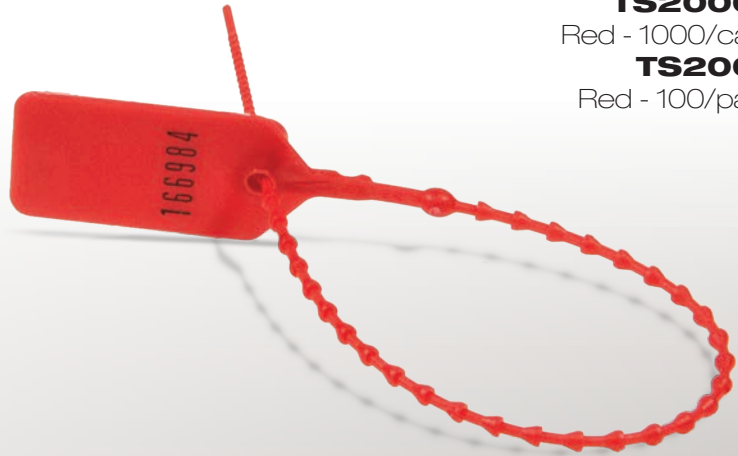

Easy-Break Seal has been developed primarily for sealing safety equipment after their annual test and certification. The low break strength (14 lbs / 6 Kgs) allows for manual removal in cases of emergency.

APPLICATION

- Regulated emergency devices

FEATURES

- Has a low breaking strength (14 lbs / 6 Kgs)
- Available in two standard colors
- Total length is 9-3/4 inches
- Can be printed with customer name and sequential serial number

California Regulatory Warning
WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

Padlock Seal

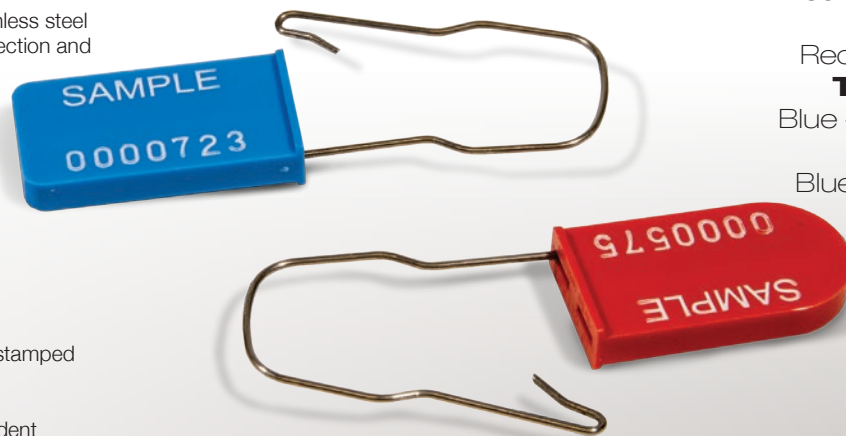

This easy to apply padlock seal features a stainless steel wire hasp which can be scored for added protection and easy removal.

APPLICATION

- Utility Meters
- Switches
- Valves
- Vending Machines
- Keys
- Medical Cabinets

FEATURES

- Consecutive and alphabetically prefixed hot-stamped numbers are available
- Name and/or logo can be hot-stamped
- Any attempt to tamper with seal is clearly evident
- Ultra Violet stabilized
- Overall length 2-1/2" with a 7/8" loop

What is the NFPA?

National
Fire
Protection
Association

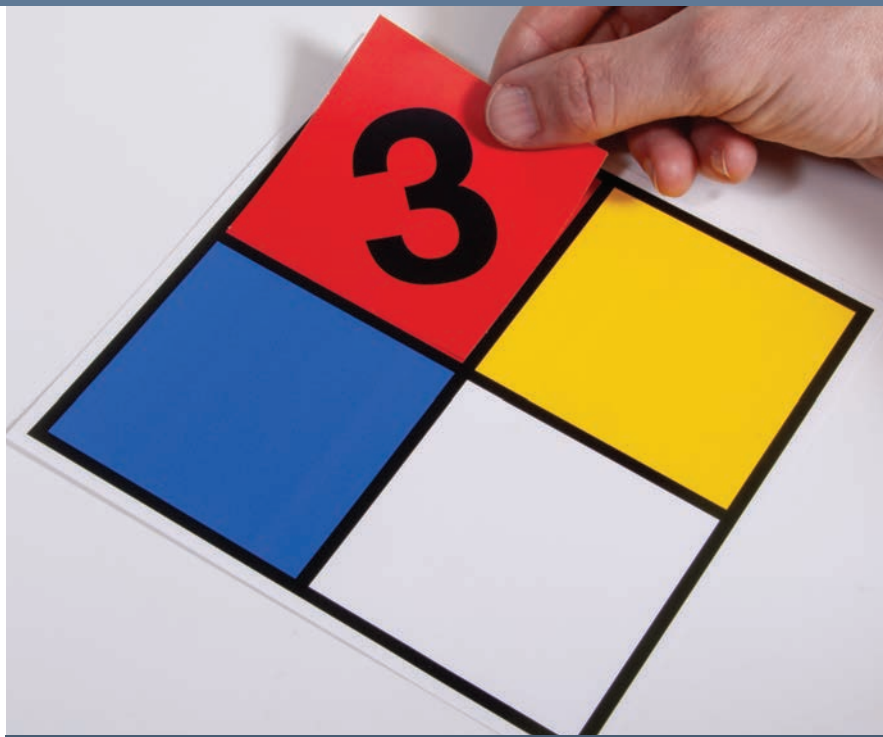

The National Fire Protection Association (NFPA) is a non-profit organization devoted to eliminating death, injury, property and economic loss due to fire, electrical and related hazards.

The NFPA Diamond

The NFPA hazard diamond is a commonly used standard of identification of the hazards of chemicals and materials.

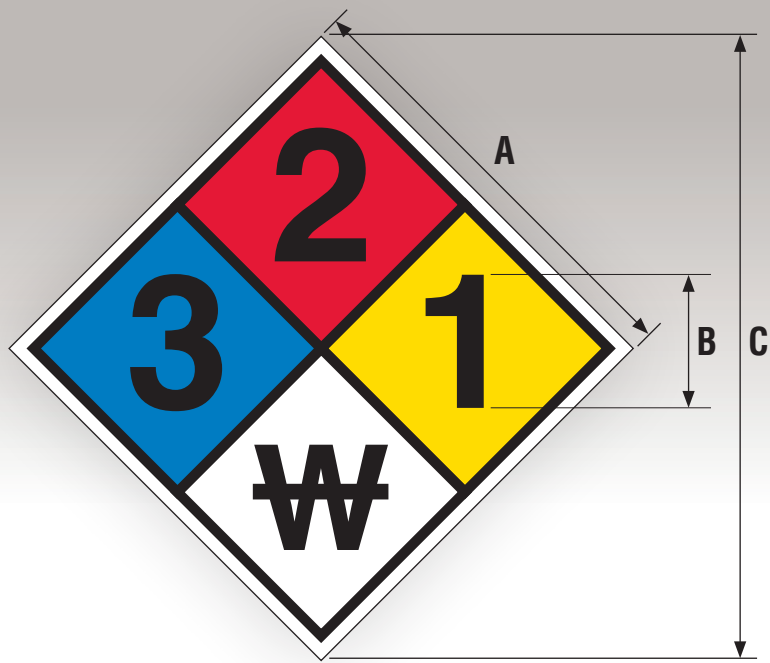

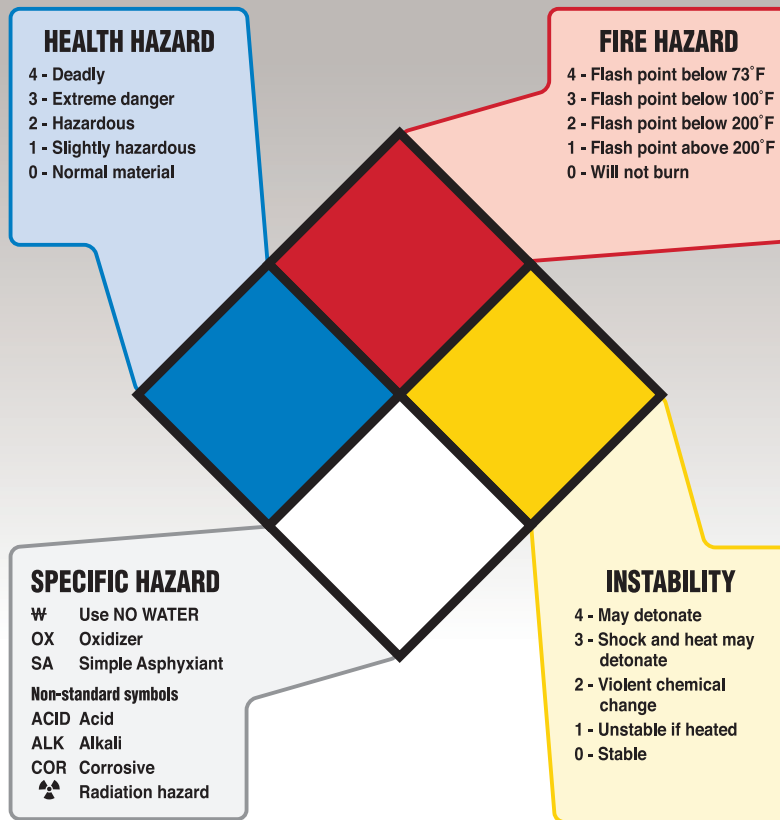

The easily read visual details help emergency first responders quickly identify the hazardous chemical, by using the rating numbers and symbols.

Learn more about NFPA at www.nfpa.org

Understanding the NFPA 704 Diamond

This is diamond-shaped NFPA 704 style sign with four smaller quadrants inside. One diamond is blue, one is red, one is yellow and one is white. The diamond-shaped signs use the four color-coded categories identify the hazards that personnel or observers are exposed to in any specific area with just a quick visual inspection of the sign diamond. The image to the right shows the different colored sections and what they represent.

Recommended Viewing Distance

The size of the diamond and the associated numbers and symbols is dependent on the distance at which the hazard ratings can be safely viewed in the event of an accident.

According to the NFPA 704 Standard, a ratio of 25 feet of viewing distance per inch of text should be used to determine the minimum text size required, up to 100 feet.

A Diamond Size	B Character Size	C Diamond Height	Legible Viewing Distance
3" x 3"	1"	4.25"	1 to 40 ft
6" x 6"	2"	8.5"	41 to 85 ft
9" x 9"	3"	12.75"	86 to 135 ft
11" x 11"	4"	15.5"	136 to 150 ft
15" x 15"	6"	21.25"	151 to 200 ft
20" x 20"	8"	28.25"	201 to 300 ft
24" x 24"	10"	34"	301 to 400 ft

NFPA Hazardous Materials Signs

NFPA workplace safety signs give a clear and obvious display of the NFPA hazards and symbology. Signs include the commonly seen NFPA diamond along with details as to the hazards it represents.

Helps identify the extent of a health or fire hazard with a chemical using the NFPA diamond system. Commonly used in workplaces using the NFPA hazard identification system. Available in an assortment of materials to suit your application.

NFPA 704 Diamond

NFPA workplace diamond gives a clear and obvious display of the NFPA hazards and symbology. Signs include the commonly seen NFPA diamond along with labels to apply different hazard numbers and symbols to change the sign to suit the specific chemical hazard. Numbers and symbols are included in the kit version of these signs and the user can apply them to meet their needs. Blank diamonds are also sold separately.

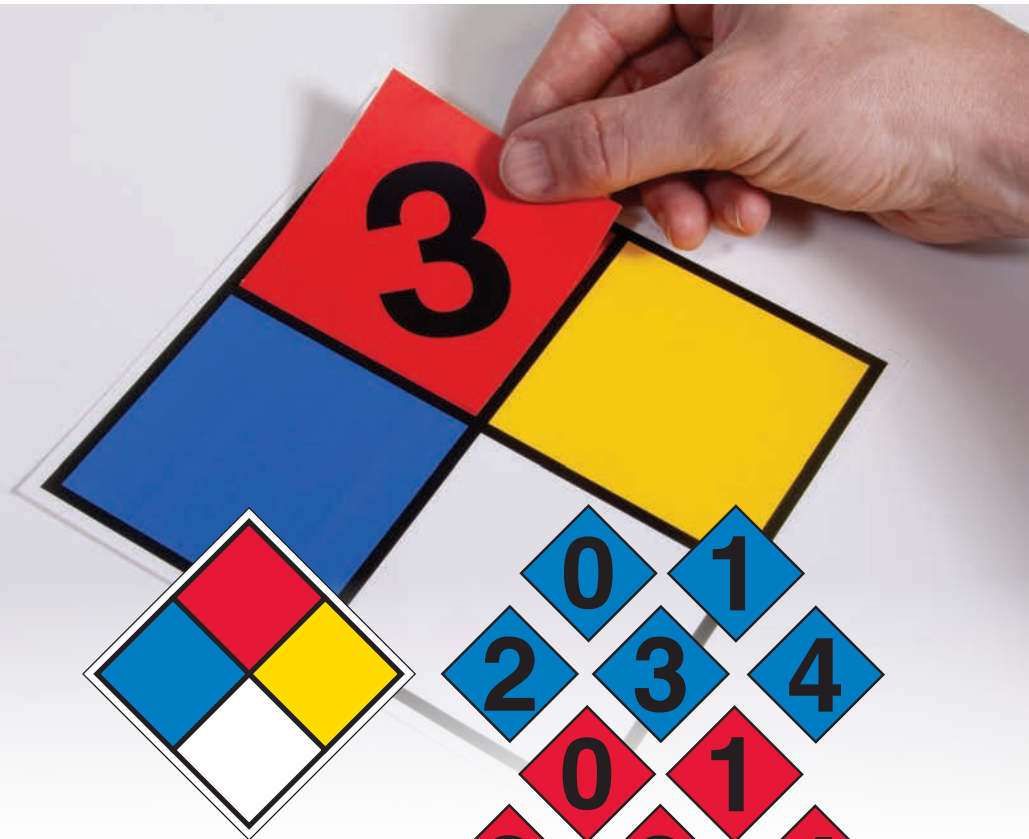

Helps identify the extent of a health or fire hazard with a chemical using the NFPA diamond system. Commonly used in workplaces using the NFPA hazard identification system.

We can also pre-print these diamonds with all your required details for an easy and professional looking result. Call us for details.

NFPA diamond only or in kit form

Each Kit Includes

- One NFPA diamond
- 15 numbers 0-4 in blue, red and yellow
- 7 specific hazard symbols

Globally Harmonized System

HazCom 2012
and
WHMIS 2015

HazCom 2012

Hazard
Communication

WHMIS 2015

Workplace **H**azardous
Materials **I**nformation **S**ystem

What are the different versions of GHS?

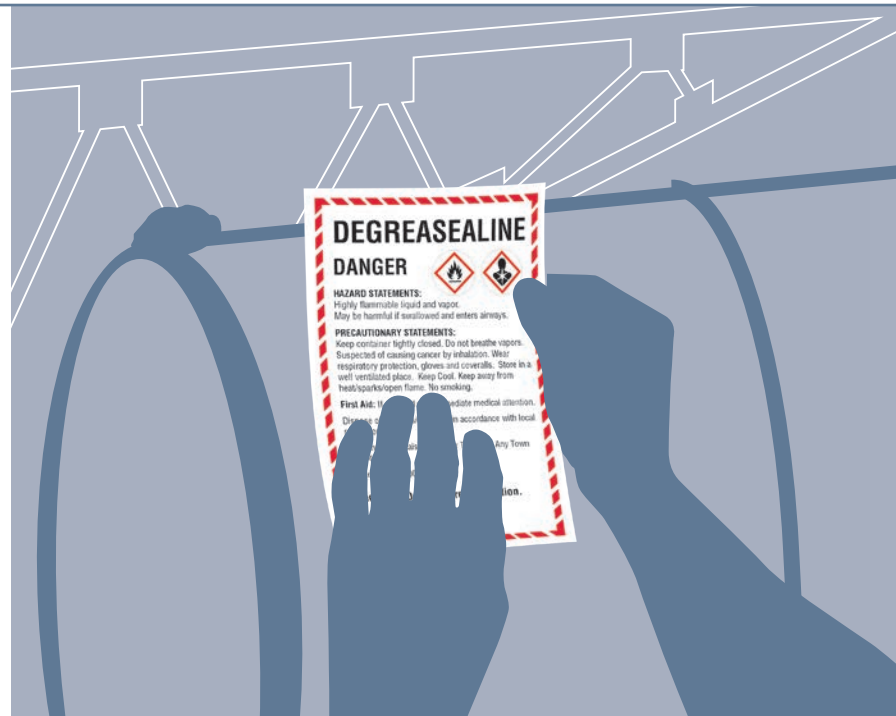

While the regulations of HazCom 2012 (US) and WHMIS 2015 (Canada) are closely aligned, they do have slight variations in classification and labeling. For example, all labels and SDSs in WHMIS 2015 (Canada) must be in both English and French, while the HazCom 2012 (US) labels and SDSs must be in English only. Other variances include a hazard class for Biohazardous Infectious Materials (BIM) and pictogram for WHMIS 2015 (Canada), which does not exist for HazCom 2012 (US), as these materials are not regulated in US workplaces.

To learn more, please visit OSHA's website: www.osha.gov and Health Canada's website: www.canada.ca for additional information.

Under the Globally Harmonized System (GHS), workplace hazardous materials have new Pictograms, Signal Words, and Hazard Statements replacing the existing system. Our products are designed for the specific requirements that these changes bring to workplaces.

Labelling

Information Wall Chart

Our GHS Wall Chart provides a comprehensive overview of new GHS labeling requirements. The chart details the 3 main hazard groups; Physical, Health & Environmental. The requirements for supplier labels when decanting or transferring hazardous chemicals; visual representations of the precautionary statement pictograms; and a list of the information required on a Safety Data Sheet.

Mount this durable, pliable plastic chart in a prominent place to help refresh your employee's knowledge of the GHS requirements. Available in two sizes.

Stock No.	HazCom 2012 (USA) Description
GHS1003	HazCom 2012 Information Wall Chart (24" x 36")
GHS1004	HazCom 2012 Information Wall Chart (18" x 24")
Stock No.	WHMIS 2015 (Canada) Description
GHS1003C	WHMIS 2015 Information Wall Chart (24" x 36")
GHS1004C	WHMIS 2015 Information Wall Chart (18" x 24")

Pictogram Wall Chart

Our GHS Pictogram Poster is a quick and easy way to convey the new GHS pictograms in the workplace. This wall chart clearly displays the new pictograms and arranges them by their hazard group under the GHS: Physical, Health & Environmental hazards. The wall chart also provides a detailed description of the related hazards. Printed in full color on durable, pliable plastic, this chart is easily mounted on any wall. Units are 24" x 36".

Safety Data Sheet

Information Station

Our GHS Information Station provides a central place to easily access all SDS sheets as well as the basic information required for the GHS system. The board is printed with the 3 main hazard groups; Physical, Health & Environmental. The requirements for supplier labels when decanting or transferring hazardous chemicals; visual representations of the precautionary statement pictograms; and a list of the information required on a Safety Data Sheet.

The station is printed in full color on a mounting board and comes with a sturdy metal pocket. Each station also comes with a standard 3 ring SDS printed binder with A - Z alphabetical dividers to sort all of your Safety Data Sheets. The mounting board is constructed of 1/4" rigid plastic with 4 mounting holes to provide easy mounting and years of durability. Available in two sizes.

Stock No.	HazCom 2012 (USA) Description

GHS Trained Stickers

These decals are great handouts at the completion of your GHS training sessions.

2.5" in diameter and printed on adhesive VynMark, these decals come 2 per sheet, 5 sheets per package, 10 stickers per package.

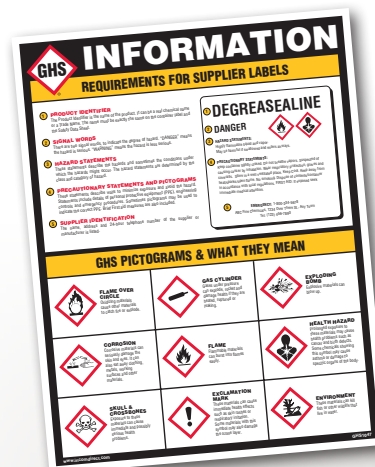

Stock No.	Description
GHS1026	GHS Trained Stickers (10/pkg)

Information Decals

This GHS Information decal is a great choice for mounting inside delivery vehicles and on equipment. It covers topics important to employees dealing with product identified under the new GHS standards including the 5 main sections of a GHS Supplier Label and the GHS formatted pictograms, including the optional Environment picto.

The decals are 8.5" wide, by 11" tall, printed on adhesive VynMark. 10 Decals/pack.

Stock No.	Description
GHS1047	GHS Information Decals (8.5" x 11")

Secondary Workplace Tags & Labels

Our secondary workplace tags and labels clearly identify hazards to your employees. These labels and tags offer an easy to use design to correctly identify the hazard information for labeling secondary containers in your workplace. The tags are made from a waterproof stock that can easily be printed on. The labels are made from a premium peel and stick material with a permanent adhesive.

Both tags and labels are available with a self laminating protective shield that is installed after completing the information, making them chemical and scuff resistant.

Pictogram Labels

4" X 4"

Quickly and easily mark your goods for shipping with our GHS Hazard Pictograms. These pictograms are 4" x 4" (100 mm x 100 mm) and come in rolls of 500 labels. Printed on gloss paper with a peel and stick adhesive, these labels are easily applied to metal or plastic containers.

Pictogram Labels

2" X 2"

Need a smaller format of GHS Pictograms for labelling your goods or documents? Our 2" x 2" GHS pictogram labels come in rolls of 500. Printed on gloss paper with peel and stick adhesive, these labels will apply easily to metal and plastic containers.

GHS Hazard Class & PPE Pictogram Labels

Provide your employees with a quick and easy way to identify Hazard Classes and Personal Protective Equipment requirements. Our labels are manufactured on high gloss paper stock with a permanent pressure sensitive adhesive for ease of application and longer durability. Make clean, professional looking labels in minutes.

Printed in sheets and padded with a cardboard backer for ease of use. Each sheet is perforated to allow removal when completed. Labels are sold in pads. 1" are 1,120 labels per pad and ½" are 1,820 labels per pad.

Hazard Pictogram Variety Pack

These Hazard Class Variety Packs provide an assortment of all the GHS hazard class pictograms in one convenient pack.

The labels are manufactured on high gloss paper stock with removable adhesive. This makes it easy to peel cleanly from most surfaces including glass and plastic. A great choice for use in laboratory settings.

Stock No.	Description
GHS1299	1" Hazard Class Variety Pack (1,120 assorted labels per pad)
GHS1300	½" Hazard Class Variety Pack (1,820 assorted labels per pad)

Signal Word Signs

Signal Words are an important part of hazard identification in the GHS. These highly visible Signal Word placards are designed to be used with our GHS Pictograms.

Available in 6.25" x 15.75" and printed on outdoor grade adhesive VynMark using durable fade resistant inks. They come with a back split liner for easy application and are sold individually or in packages of 100.

GHS1276

Safety Data Sheet

Pocket Booklet

Our SDS Pocket Booklet is designed as a quick reference guide to the new style Safety Data Sheets (SDS) under GHS. This booklet provides an alphabetical list of terms and definitions for all the relevant GHS terminology, sections of the SDS, GHS symbols as well as a table breakdown of Acute Toxicity Classes. The booklet also provides a full color index of GHS hazard symbols and their meanings. The back of the book also has a small section for any additional notes to be entered. Designed to fit easily in a shirt pocket or desk-top for easy reference.

The booklets are 3-5/8" x 4-7/8" and sold 10/pkg (English edition - 42 pages).

Stock No.	WHMIS 2015 (Canada) Description
GHS2008	WHMIS 2015 SDS Pocket Booklet - French

Pictogram Reference

Wallet Cards

Our GHS Wallets Cards are a quick and easy reference to the new GHS pictograms and their meanings. One side of the card provides the complete set of GHS pictograms with a detailed description of each. The other side contains the list of information required to be found on an SDS (Safety Data Sheet) as well as the images of the various Precautionary Statement Pictograms.

Printed in full color to match the look of the GHS system requirements. Each card is 4-1/4" x 2-1/2" with rounded corners. Covered in a heavy lamination on both sides to provide long term durability in pockets or wallet. Sold in packages of 50.

Make Your Own Laser Labels

Our laser printer templates make it easy for you to make your own labels for the new GHS requirements. These laser printer ready paper sheets come with a pre-printed red border and pre-cut labels. Use any desktop publishing package to quickly make your own professional looking labels.

Made from laser printable paper with permanent peel and stick backing. If color printing is not an option, use our Hazard Class and Personal Protective Equipment labels (sold separately) to complete your labels. Laser labels are sold in packages of 100 sheets.

Stock No.	Description
GHS1277LP	8.5" x 14" (1 per/sheet)
GHS1278LP	8.5" x 11" (1 per/sheet)
GHS1279LP	8.5" x 5.5" (2 per/sheet)
GHS1280LP	4.25" x 5.5" (4 per/sheet)
GHS1281LP	2.83" x 2.75" (12 per/sheet)

Make Your Own Thermal Transfer Labels

Need an open format label for your GHS requirements? Try our generic GHS label system. Labels are Thermal Transfer paper with a permanent adhesive and can be hand printed or used in any standard Thermal Transfer printer.

Use any standard desktop publishing package to quickly make your own Professional looking labels. Enhance the label with our Hazard Class and Personal Protective Equipment labels (sold separately). Labels sold by the roll.

Stock No.	Description
GHS1204	4" X 2" (1000/roll)
GHS1205	4" X 6" (500/roll)
GHS1206	6" X 7.125" (250/roll)
GHS1207	8" X 8" (250/roll)

Supplier Laser Labels

These open format labels are perfect for creating supplier labels for larger packaging formats. The paper labels are ideal for any indoor application and the more durable adhesive VynMark labels will work in outdoor applications.

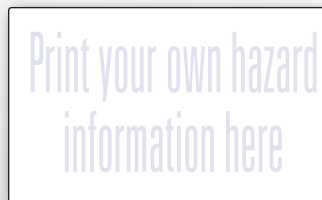

All labels are manufactured on laser printable stock with a peel and stick adhesive back for permanent application. Labels come in both 8.5" x 11" and 8.5" x 14" size. Sold in bundles of 100 labels.
