

Bendix® ST-3™ Safety Valves

V.M.R.S. 13-010-073
 i SD-03-1901

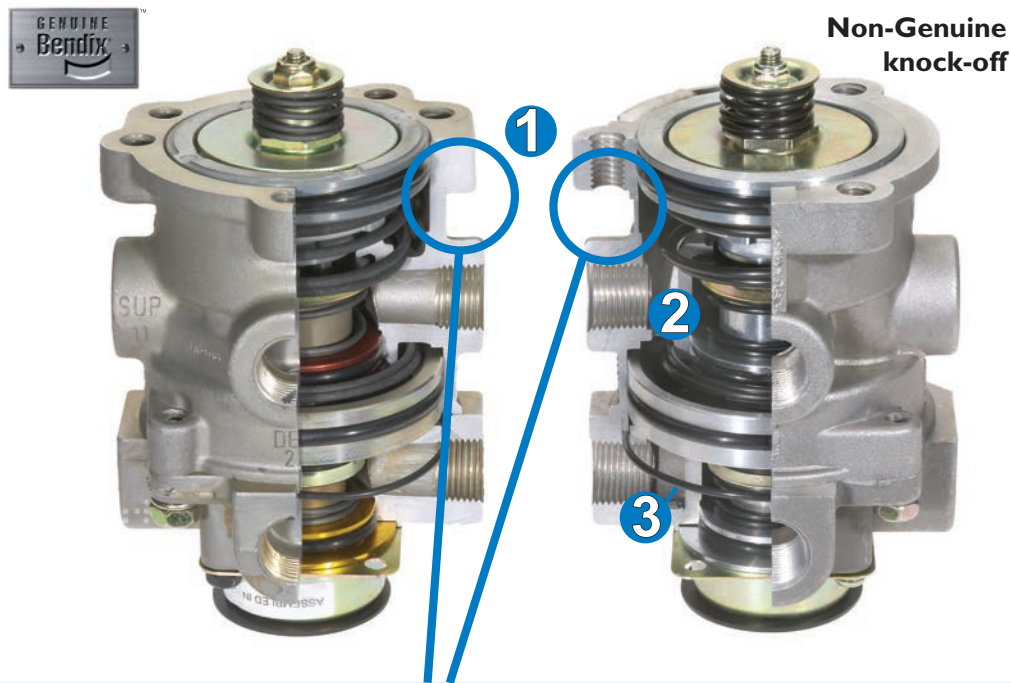

See the Compressor section (01) of this catalog for Bendix® ST-4™ Safety Valves.

ST-3™ Safety Valve Pc. No.	Pipe Thread	Pressure Setting (psi)
284142	1/4"	150
284143	3/8"	150
285849	1/4"	175
285850	1/4"	75

Do you really know what's inside the valves you buy?

Appearances can be deceiving. The two valves pictured below may look alike but their performance is drastically different. The non-genuine knock-off is a component bought right off the shelf, and its poor quality is just a sample of what is being sold in the market every day.

- ❶ The knock-off valve's wall is 56% thinner, making it more susceptible to cracking or even a complete valve rupture.
- ❷ O-rings, seals, bolts & pistons — all built with inferior materials — can lead to accelerated wear and leakage.
- ❸ Inconsistent spring tension on the knock-off can result in brake imbalance and longer stopping distances.

Your brakes are not the place to cut corners. A poorly manufactured knock-off valve — like the one pictured on the right above — can, and frequently does, affect the performance, durability and long-term reliability of your braking system. Protect your vehicle by using only genuine Bendix® parts.

Use the best. Use Bendix. Look for the familiar Bendix name and logo on the box. For the name of the authorized distributor nearest you talk to your Bendix Account Manager, call 1-800-AIR-BRAKE (1-800-247-2725) or visit www.bendix.com today.
