

# NYK-77, CORROSION PREVENTATIVE COMPOUND

- Corrosion preventive compound for electrical contacts, switches and junction boxes
- For periodic use with all electrical contact not using Fit 'N Forget connectors
- Available in a variety of sizes

	Part Number	Container Type	Container Volume
	97940	Can	8 oz
	97943	Can	32 oz
	97944	Tube	2 oz
	98013	Tube	5 oz
	97948	Cartridge	14 oz

# MULTI-PURPOSE MAINTENANCE SPRAY

- Quickly loosens frozen or seized parts
- Invades hard-to-reach crevices and creeps through the tightest seams
- Displaces moisture
- Corrosion Control: Forms a protective thin film barrier to stop oxidation and prevent rust from spreading
- Dissolves corrosion oxide - stops rust on contact
- Maintains lubricity under high loads for superior reduction of friction, heat and noise
- Use on fifth wheel springs and rails, glad hands, control linkages, roll-up doors, hinges and latches, chains and pulleys and more
- Outperforms other penetrants
- Prevents and removes corrosion build-up
- High dielectric insulation against electrolysis
- Extreme pressure lubricant
- For use on connectors including ABS, 4-13 way plugs and sockets, battery terminals and more

Part Number	Container Type	Container Volume
97946	Can	14 oz

# NANO SERIES, CORROSION PREVENTATIVE COMPOUND

- No curing or drying time needed
- Hydrophobic – resists water and moisture
- Operating temperature of -40°F to +400°F
- Excellent dielectric strength
- Simple, even application
- Superior protection from oxidation
- Protects electrical contacts from breakdown
- caused by high temperature and high voltage

	Part Number	Container Type	Container Volume
	98050	Tube	2 oz
	98051	Tube	5 oz
	98052	Cartridge	14 oz
	98053	Can	8 oz
	98054	Can	32 oz
	98056	Bottle	14 oz
	98057	Refill Bottle	64 oz
	98058	Can	8 oz

Dielectric Gel/Spray adheres to metal surfaces to provide exceptional protection from corrosion and moisture. It is designed to extend component life and protect equipment in harsh environments and extreme temperature conditions. It is a smooth, tacky, water-resistant, nano-engineered compound with excellent chemical inertness. Truck-Lite recommends using nanoSeal spray on sealed connectors to prevent hydraulic lock from over-application.

Dielectric Enamel is an interior and exterior use coating that adheres to metal surfaces and creates a solid coating to provide exceptional protection from corrosion and moisture. It is designed to extend component life and protect against harsh corrosive environments.
