

QUICK-FIX® KITS

THIS IS WHERE IT ALL BEGAN.

The Original End Fitting Kit, 31402, was the very first product developed by Tramec Sloan (then, Hose America) when it was founded in 1981. It was invented in Iola, Kansas by Sergio Campanini, founder of the company. He was joined by Gil Brown, Jim Hopper and Bill Lee as stock holders when the company was incorporated.

The "Swivel Hose Coupling" patent was applied for October 6, 1980 and granted August 10, 1982. This invention then led to the development of the remainder of the "live swivel" fitting line. First utilized by Monon Trailer and now by trailer manufacturers all over the world!
