BREEZE Clamp Catalog

BREEZE®

YOUR ONE SOURCE FOR QUALITY CLAMPS

BREEZE Corporations introduced, pioneered and has been supplying worm-drive hose clamps to the aircraft, automotive, heavy duty vehicle and industrial markets for over fifty years. The Breeze Aero-Seal Clamp was invented and patented specifically for use on aircraft engines to supply the vibration proof sealing integrity necessary on critical oil line connections. From this initial

aircraft application, Breeze Aero-Seal clamps were drawn into hose sealing applications in all segments of industry where this much needed, vibration proof clamp proved itself as a versatile, convenient, rugged and reliable clamping product. All Breeze clamps are produced to stringent aircraft, vehicle, and international quality standards. They have been imitated or approximated - but for widest utility and performance, and on the basis of design refinement and performance, Breeze Clamps have no equal. Breeze has continuously developed and expanded its product line of clamps since the first Aero-Seals - each line is designed for specific areas of use with performance features and refinements that set it apart, but all conform to the same basic, high quality Breeze engineering standards. Breeze Miniatures, Power-Seals, Aero-Seals, Euro-Seals, Liner Clamps, NAS, AN, and MS Clamps, Hi-Torques, Constant-Torques, Make-A-Clamp Kits, and T-Bolt/V-Band Clamps continue to enable each industry and user to meet exact requirements with items of proven quality and reliability.

Leaders in Clamping Technology

MINIATURE CLAMPS

A lightweight, streamlined clamp generally used in small diameter applications such as air & fuel lines. The streamlined configuration allows for installation in tight fitting or difficult to reach areas. This clamp creates high sealing pressure with only 10 to 15 in./lbs. of installation torque. 5/16" (7.9mm) Band

Aero-Seal® Industrial/Aircraft Clamps

The original stainless steel worm-drive clamp. Heavy duty four-piece QUADRA-LOCK construction enables far more tightening torque to be delivered to the band perforations. Use for aircraft and heavy-duty industrial applications. 9/16" (14.2mm) band.

* 200 series also available with wing/thumb screw.

MARINE GRADE High Corrosion Resisting Clamps

All parts 300 series stainless steel. High corrosion resistant stainless steel clamps necessary for marine, underground, and other high corrosion applications. Also available in 316 Stainless Steel - use 316 prefix for Aero-Seal construction and 660 prefix for Power-Seal construction.

* For embossed design marine grade clamps, see Euro-Seal 73000 & 76000 series.

* See Marine Products catalog for complete product information.

LINER CLAMPS For Soft/Silicone Hose

Protects soft-surface hose (silicone and others) from damage caused by extrusion or shearing through the band slots through an integral extension of the band as an inner protective liner. Breeze liner clamps give the truest concentric seal of any clamp made.

Liner clamps also available in Hi-Torque and Power-Seal Series.

HI-TORQUE® Super Heavy-Duty Clamps

The strongest worm-gear clamp made in the world today. Withstands more than 4 times the SAE torque requirements for Type F worm-drive clamps. Eight screw-threads are engaged in the band simultaneously for incredible torquing drive (over 150 in.lbs.), sealing pressure, and vibration resistance. 5/8" (15.8mm) band. Also available in 316 Stainless Steel - use HTS prefix for standard ranges and HPS prefix for extended ranges.

Available with Liner

Quality Hose Clamps for Every Industrial Application

EURO-SEAL® CLAMPS

The Euro-Seal embossed band-thread clamp combines our experience in manufacturing high strength/high performance perforated worm-gear clamps with the European preference for embossed design clamps for better hose protection. They have embossed threads and round band edges that prevent hose extrusion or damage caused by traditional band slot perforations. This style is OE specified and preferred by many European Vehicle manufacturers.

CONSTANT-TORQUE® CLAMPS

A revolutionary clamp that reacts to changes in hose systems by actually increasing or decreasing its own diameter as the system expands or contracts. The BREEZE "Constant-Torque" Clamping System is the answer for any manufacturer experiencing leakage or rupture problems because of "cold flow" or changes in environmental or operational temperatures.

MakeAclamp®

This is a maintenance "clamp system" in a box. By simply cutting off a piece of banding from a continuous roll, you can make any size 100% stainless steel worm-drive clamp from 3" diameter on up (10 inch or 10 foot diameter, you pick it and you do it in fifteen seconds). It's a must for anyone who's likely to encounter requirements for varying sized large clamps. Reusable. Superior to and more versatile than "crimp/buckle" banding and strapping products.

MAKE ANY SIZE CLAMP

AEROSPACE & "MIL" SPEC CLAMPS

MS35842 Clamps - Primarily a military vehicle and ordnance clamp. Low pressure, type "F." Federal Supply Class 4730. Slotted hex head screw. 100% stainless steel.

AN737TW Clamps - Primarily an aircraft application clamp. Federal Supply Class 4730. Stainless steel band, housing and saddle with stainless steel thumb (wing) screw.

NAS1924 Clamps - Available above size 48.

NAS1922 Clamps - Primarily a light-weight, aircraft application clamp. Federal Supply Class 4730. 100% stainless steel. Available with either round slot (-1) or hex head (-3) screw. Both screw styles can be supplied with optional Lock Wire hole (H).

Quality Hose Clamps for Every Industrial Application

BREEZE T-BOLT & V-BAND CLAMPS

Breeze provides comprehensive application coverage with stainless steel T-Bolt, spring-loaded T-Bolt and Turbo V-Band clamps which are performance engineered for long term durability and manufactured to the highest quality standards.

Applications Includes:

- Turbo
- Marine Exhaust
- Sump Pump
- Diesel Exhaust
- Air Brakes
- Diaphragm Bodies
- Flanged Tanks
- Pumps
- Dairy Industry
- Cannisters
- Lab Equipment
- Bleed Air Systems
- Filter Bags
- Sanitary Systems
