- ◆ **Fuel Savings:** Using CFD (Computational Fluid Dynamics) testing on a trailer/tractor combination there was a 0.4% fuel savings with slotted mud flaps.
- ◆ **Weight Savings:** On a truck/trailer combination using 4 flaps you could expect at least an 8 lb savings over a 5 lb rubber flap.
- ◆ **Payback:** in approximately a year.
- ◆ **High Quality Materials:** High impact nylon suitable for winters (to -70°C). After gravelometer testing there was no cracking or fractures observed. Air Pass withstood gravel impacts that conventional poly flaps cannot.
- ◆ No need for anti-sail brackets.
